

Fact Sheet

ELECTION OF MAYOR AND DEPUTY MAYOR BY COUNCILLORS

Summary

Councillors must elect a mayor from among their number every two years unless they have a popularly elected mayor.

Councillors may also elect a deputy mayor. The deputy mayor may be elected for the mayoral term or a shorter term.

The election of the mayor and the deputy mayor must be conducted in accordance with clause 394 and Schedule 7 of the *Local Government (General) Regulation 2005* (the Regulation).

The purpose of this document is to assist councils to conduct mayoral and deputy mayoral elections in accordance with these requirements. It includes scripts for key activities to help returning officers exercise their functions. These scripts are provided in the text boxes inserted in the relevant parts of this document.

How can councils use this document?

Electing a mayor is an important activity. It is vital that the process is smooth, open and easy to follow and not rushed or confusing. Where necessary, it may be appropriate to stop and provide clarification for the benefit of councillors, staff or the gallery.

Returning officers can circulate this document prior to the meeting to help councillors understand the election process.

Election of a mayor after an ordinary election of councillors

An election for mayor must be held within three weeks of the declaration of the ordinary election at a meeting of the council.

The returning officer is to be the general manager or a person appointed by the general manager.

As no mayor or deputy mayor will be present at the start of the meeting, the first business of the meeting should be the election of a chairperson to preside at the meeting. Alternatively, the returning officer may assume the chair for the purpose of conducting the election.

Mid-term election of a mayor

A mayor elected by councillors holds office for two years. A mid-term mayoral election must be held in the September two years after the ordinary election of councillors or the first election of a new council following its establishment.

Procedures

Prior to the meeting

Before the council meeting at which the election is to be conducted, the returning officer will give notice of the election to the councillors.

The notice is to set out how a person may be nominated as a candidate for election as chairperson.

As returning officer, I now invite nominations for the position of mayor/deputy mayor for [name of council] for a two year period.

In accordance with the Local Government (General) Regulation 2005, two or more councillors may nominate a councillor (one of whom may be the nominee) for the position of mayor/deputy mayor. Nominations must be in writing and the nominee must consent to their nomination in writing.

A councillor may be nominated without notice for election as mayor or deputy mayor. The nomination is to be made in writing by two or more councillors (one of whom may be the nominee). The nomination is not valid unless the nominee has indicated consent to the nomination in writing.

The returning officer checks the nomination forms and writes the nominees' names on a candidates' sheet.

At the meeting

At the start of the first meeting after an ordinary election, in the absence of a chairperson, the returning officer assumes the chair and announces that the first item of business is to be the election of a mayor.

If a chairperson is present, they announce that the first item of business is the election of the mayor then vacates the chair for the returning officer who will then conduct the election.

The returning officer reads out the names of the nominees and seeks confirmation that the nominee has accepted the nomination.

If only one councillor has been nominated for the position of mayor/deputy mayor, the nominee is elected.

As there is only one nominee for the role of mayor/deputy mayor, I declare that [name of successful candidate] is elected as mayor/deputy mayor for the ensuing two years.

If more than one candidate has been nominated, the council must determine by resolution, the method of voting for the position of mayor/deputy mayor, by way of one of the following methods:

- Open voting – i.e. by show of hands
- Ordinary ballot – i.e. a secret ballot (place an "X" against the candidate of their choice)
- Preferential ballot – i.e. place 1, 2, 3 etc. against each candidate.

The returning officer must ask for a motion to be put to the meeting by one of the councillors on the preferred method of voting for the election of a chairperson. This must then be seconded and voted on by the councillors.

Note: In the event of a tie, if there is a chairperson, they may use their casting vote. If there is a tie and no chairperson, an election for the role of chairperson should be conducted. Then the election for mayor resumes.

Open voting (show of hands)

Open voting is the most transparent method of voting. It is also the least bureaucratic method and reflects normal council voting methods.

The returning officer will advise the meeting of the method of voting and explains the process.

It has been resolved that the method of voting for the position of mayor/deputy mayor will be by show of hands.

Each councillor is entitled to vote for only one candidate in each round of voting.

I will now write each candidate's name on a slip of paper and deposit it in a barrel. The first name out of the barrel will be written first on the tally sheet, with second name out being written second on the tally sheet, etc.

When all candidates' names have been written on the tally sheet, the returning officer announces the names of the candidates and, commencing with the first candidate, states the following:

Would those councillors voting for [name of candidate] please raise your hand.

The returning officer records the number of votes for each successive candidate on the tally sheet and announces the number of votes received for each candidate.

The minute taker records the vote of each councillor.

The returning officer should check with the minute taker that each councillor has voted. If a councillor has not voted it should be confirmed that they are abstaining (an informal vote).

Two candidates

If there are only two candidates for the position of mayor/deputy mayor and the voting is higher for one candidate than another (number of formal votes recorded on the tally sheet), the returning officer then announces the result.

[Name of candidate] has the higher number of formal votes and as a result I declare that [name of candidate] is elected as mayor/deputy mayor for the ensuing two years.

In the event of a **tied vote**, the returning officer will advise the meeting of the following process.

In accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the

names of the candidates on similar slips of paper, fold them and place them in the barrel. Please note that the candidate whose name is drawn out will be declared as mayor/deputy mayor.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests a staff member to shake the barrel.

The returning officer then draws a name out of the barrel and shows the meeting.

I declare that [name of candidate] is elected as mayor/deputy mayor for the ensuing two years.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

Three or more candidates

If there are three or more candidates, the candidate with the lowest number of votes for the position of mayor/deputy mayor is excluded.

[Name of candidate], having the lowest number of votes, is excluded.

The voting continues as above until there are only two candidates remaining (see voting for **two candidates** above).

In the event that the **lowest number of votes are tied**, the returning officer advises the meeting of the following process:

In accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the names of the candidates on similar slips of paper, fold them and place them in the barrel. Please note that the candidate whose name is drawn out will be excluded.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests a staff member to shake the barrel.

The returning officer then draws a name out of the barrel and shows it to the meeting.

I declare that [name of candidate] is excluded.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

Ordinary ballot – (secret ballot)

The returning officer advises the meeting of the method of voting and explains the process.

It has been resolved that the method for voting for the position of mayor/deputy mayor will be by ordinary ballot, in other words by placing an “X” against the candidate of the councillor’s choice.

The returning officer announces the names of the candidates for mayor/deputy mayor and writes each name on a slip of paper and deposits it in a barrel.

The returning officer requests that a staff member shakes the barrel and advises that the order in which the names will appear on the ballot paper will be determined by a draw out of the barrel, i.e. first name out of the barrel is written first on the ballot papers and so on.

It will be necessary to have a number of blank papers as this process may require more than one round of voting.

The returning officer writes the names on one set of the ballot papers and initials the front of each ballot paper.

A staff member distributes the ballot papers and collects them into the ballot box when completed and gives it to the returning officer who counts the votes and records them on the tally sheet.

The returning officer announces the results.

[Name of candidate], having the lowest number of votes, is excluded.

In the event that the **lowest number of votes are tied**, the returning officer advises the meeting of the following process:

In accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the names of the candidates on similar slips of paper, fold them and place them in the barrel. Please note that the candidate whose name is drawn out will be excluded.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests a staff member to shake the barrel.

The returning officer then draws a name out of the barrel and shows it to the meeting.

I declare that [name of candidate] is excluded.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

The returning officer writes the names of the remaining candidates on a further set of the ballot papers and initials the front of each ballot paper.

The staff member distributes ballot papers listing the remaining candidates and collects them into the ballot box when completed and gives it to the returning officer who again counts the votes and records them on the tally sheet and announces the results.

The process continues until two candidates remain, where a final vote takes place.

[Name of candidate] has the higher number of votes and I declare that [name of candidate] is elected as mayor/deputy mayor for the ensuing two years.

In the event of a **tied vote** between the two remaining candidates, the returning officer makes the following statement and announces the process.

The votes are tied between [name of candidate 1] and [name of candidate 2] having received [number] votes each, and, in accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the names of the candidates on similar slips of paper, fold them and place them in the barrel.

Please note that the candidate whose name is drawn out will be declared as mayor/deputy mayor.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests that a staff member shakes the barrel.

The returning officer then draws a name out of the barrel and shows the meeting.

I declare that [name of candidate] is elected as mayor/deputy mayor for the ensuing two years.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

Preferential ballot

The returning officer explains the process.

It has been resolved that the method for voting for the position of mayor/deputy mayor will be by preferential ballot, i.e. placing 1, 2 and so on against the candidate of the councillor's choice in order of preference for all candidates.

The returning officer announces the names of the candidates for mayor/deputy mayor and writes each candidate's name on a slip of paper and deposits it in a barrel.

The returning officer requests that a staff member shakes the barrel and advises that the order in which the names will appear on the ballot paper will be determined by a draw out of the barrel, i.e. first name out of the barrel is written first on the ballot papers and so on.

The returning officer writes the names on the ballot papers and initials the front of each ballot paper. This method of voting requires only one set of ballot papers.

A staff member distributes the ballot papers and collects them when completed and gives them to the returning officer who counts the first preference votes and records them on the tally sheet.

If a candidate has an absolute majority of first preference votes (more than half), the returning officer declares the outcome.

[Name of candidate], having an absolute majority of first preference votes, is elected as mayor/deputy mayor for the ensuing two years.

If no candidate has the absolute majority of first preference votes, the returning officer excludes the candidate with the lowest number of first preference votes.

[Name of candidate], having the lowest number of first preference votes, is excluded.

The preferences from the excluded candidate are distributed. This process continues until one candidate has received an absolute majority of votes, at which time the returning officer announces the result.

[Name of candidate], having an absolute majority of votes, is elected as mayor/deputy mayor for the ensuing two years.

In the event of a **tied vote** where there are only two candidates remaining in the election, the returning officer explains the process.

The votes are tied between [name of candidate 1] and [name of candidate 2] having received [number] votes each, and, in accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the names of the candidates on similar slips of paper, fold them and place them in the barrel. Please note that the candidate whose name is drawn out will be declared as mayor/deputy mayor.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests a staff member to shake the barrel. The returning officer then draws a name out of the barrel and shows the meeting.

I declare that [name of candidate] is elected as mayor/deputy mayor for the ensuing two years.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

In the event that the **lowest number of votes are tied** and where there are three or more candidates remaining in the election, the returning officer advises the meeting of the process.

In accordance with clause 12 of Schedule 7 of the Local Government (General) Regulation 2005, I will now write the names of the candidates on similar slips of paper, fold them and place them in the barrel. Please note that the candidate whose name is drawn out will be excluded and their preferences distributed.

It is appropriate to show the meeting the names and the barrel. Councillors may inspect but not touch the items.

The returning officer places the names of the candidates into the barrel and requests that a staff member shakes the barrel.

The returning officer then draws a name out of the barrel and shows the meeting.

I declare that [name of candidate] is excluded and any votes cast for them will be distributed by preference.

The returning officer then draws out the remaining name and reads it for completeness. The second name should be shown to the meeting.

Schedule 7 - Election of Mayor by Councillors

Part 1 Preliminary

1 Returning officer

The general manager (or a person appointed by the general manager) is the returning officer.

2 Nomination

- (1) A councillor may be nominated without notice for election as mayor or deputy mayor
- (2) The nomination is to be made in writing by 2 or more councillors (one of whom may be the nominee). The nomination is not valid unless the nominee has indicated consent to the nomination in writing.
- (3) The nomination is to be delivered or sent to the returning officer.
- (4) The returning officer is to announce the names of the nominees at the council meeting at which the election is to be held.

3 Election

- (1) If only one councillor is nominated, that councillor is elected.
- (2) If more than one councillor is nominated, the council is to resolve whether the election is to proceed by preferential ballot, by ordinary ballot or by open voting.
- (3) The election is to be held at the council meeting at which the council resolves on the method of voting.
- (4) In this clause:
ballot has its normal meaning of secret ballot.
open voting means voting by a show of hands or similar means.

Part 2 Ordinary ballot or open voting

4 Application of Part

This Part applies if the election proceeds by ordinary ballot or by open voting.

5 Marking of ballot-papers

- (1) If the election proceeds by ordinary ballot, the returning officer is to decide the manner in which votes are to be marked on the ballot-papers.
- (2) The formality of a ballot-paper under this Part must be determined in accordance with clause 345 (1) (b) and (c) and (6) of this Regulation as if it were a ballot-paper referred to in that clause.
- (3) An informal ballot-paper must be rejected at the count.

6 Count—2 candidates

- (1) If there are only 2 candidates, the candidate with the higher number of votes is elected.
- (2) If there are only 2 candidates and they are tied, the one elected is to be chosen by lot.

7 Count—3 or more candidates

- (1) If there are 3 or more candidates, the one with the lowest number of votes is to be excluded.
- (2) If 3 or more candidates then remain, a further vote is to be taken of those candidates and the one with the lowest number of votes from that further vote is to be excluded.
- (3) If, after that, 3 or more candidates still remain, the procedure set out in subclause (2) is to be repeated until only 2 candidates remain.
- (4) A further vote is to be taken of the 2 remaining candidates.
- (5) Clause 6 of this Schedule then applies to the determination of the election as if the 2 remaining candidates had been the only candidates.
- (6) If at any stage during a count under subclause (1) or (2), 2 or more candidates are tied on the lowest number of votes, the one excluded is to be chosen by lot.

Part 3 Preferential ballot

8 Application of Part

This Part applies if the election proceeds by preferential ballot.

9 Ballot-papers and voting

- (1) The ballot-papers are to contain the names of all the candidates. The Councillors are to mark their votes by placing the numbers “1”, “2” and so on against the various names so as to indicate the order of their preference for all the candidates.
- (2) The formality of a ballot-paper under this Part is to be determined in accordance with clause 345 (1) (b) and (c) and (5) of this Regulation as if it were a ballot-paper referred to in that clause.
- (3) An informal ballot-paper must be rejected at the count.

10 Count

- (1) If a candidate has an absolute majority of first preference votes, that candidate is elected.
- (2) If not, the candidate with the lowest number of first preference votes is excluded and the votes on the unexhausted ballot-papers counted to him or her are transferred to the candidates with second preferences on those ballot-papers.
- (3) A candidate who then has an absolute majority of votes is elected, but, if no candidate then has an absolute majority of votes, the process of excluding the candidate who has the lowest number of votes and counting each of his or her unexhausted ballot-papers to the candidates remaining in the election next in order of the voter’s preference is repeated until one candidate has received an absolute majority of votes. That candidate is elected.
- (4) In this clause, “**absolute majority**”, in relation to votes, means a number that is more than one-half of the number of unexhausted formal ballot-papers.

11 Tied candidates

- (1) If, on any count of votes, there are 2 candidates in, or remaining in, the election and the numbers of votes cast for the 2 candidates are equal—the candidate whose name is first chosen by lot is taken to have received an absolute majority of votes and is therefore taken to be elected.
- (2) If, on any count of votes, there are 3 or more candidates in, or remaining in, the election and the numbers of votes cast for 2 or more candidates are equal and those candidates are the ones with the lowest number of votes on the count of the votes—the candidate whose name is first chosen by lot is taken to have the lowest number of votes and is therefore excluded.

Part 4 General

12 Choosing by lot

To choose a candidate by lot, the names of the candidates who have equal numbers of votes are written on similar slips of paper by the returning officer, the slips are folded by the returning officer so as to prevent the names being seen, the slips are mixed and one is drawn at random by the returning officer and the candidate whose name is on the drawn slip is chosen.

13 Result

The result of the election (including the name of the candidate elected as mayor or deputy mayor) is:

- a) to be declared to councillors at the council meeting at which the election is held by the returning officer, and
- b) to be delivered or sent to the Departmental Chief Executive and to the Chief Executive of Local Government New South Wales.

1. INTRODUCTION

1.1 Brief

SGS was engaged by Murrumbidgee Region Council to provide a market demand assessment for a proposed residential subdivision in the township of Darlington Point. Darlington Point is located on the border of Murrumbidgee (C) and Griffith (C) in southern NSW.

The proposed structure of the subdivision is identified below in Figure 1. The subdivision is located at the western edge of the Darlington Points township boundary.

FIGURE 1: PROPOSED DARLINGTON POINT RESIDENTIAL SUBDIVISION

Source: SGS 2019

1.2 Report Structure

The report is broken into five main components which are listed below:

- Catchment definition; will identify the main areas of interest for data collection and analysis for the purpose of assessing market conditions of the proposed subdivision
- Local market overview; will provide findings from consultation with real estate agents, along with analysis of historical transactional and sales data for the various regions identified.
- Demand Assessment; will explore underlying demand drivers for residential land subdivision.
- Take-up Analysis; this section identifies the likely rate of lot consumption given current underlying land patterns for each of the identified regions.
- Discussion; this section explores potential comparison sites and a hypothetical alternative development scenario.

1.3 Project Scope and Reporting

The project scope was to provide a market assessment across the various catchment geographies for the proposed subdivision, incorporating demand from within Darlington Point and identifying the likely migration patterns within the region based on historical data.

The expected take-up of the subdivision was estimated, based on an analysis of occupancy rates, household sizes and spill overgrowth from nearby centres. Additionally, the project identified the current development patterns (supply pipeline) that may affect the take-up rate of the proposed development.

2. CATCHMENT DEFINITION

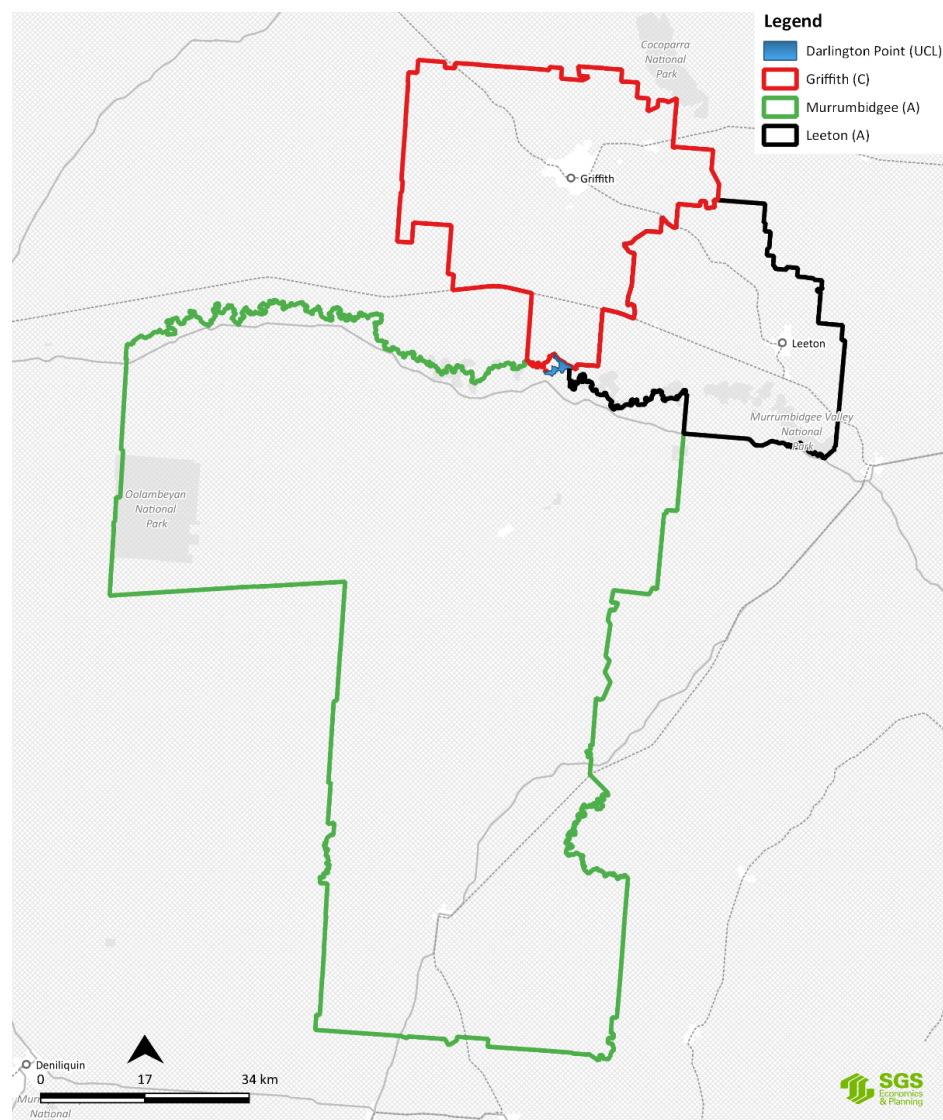

2.1 Geographies

For the purposes of the assessment, there are four areas that are identified for exploration. Traditional LGA boundaries of Griffith (C), Leeton (A) and Murrumbidgee (A) are taken at their 2016 geography produced by ABS.

Darlington Point has been defined using the Urban Centre Locality (UCL) geography produced by ABS, in order to allow exploration of census data whilst being able to identify responses separate to the wider area.

These Geographies are displayed in comparison to each other below in Figure 2.

FIGURE 2: HOUSING MARKET ASSESMENT CATCHMENTS

Source: SGSEP 2019

3. LOCAL MARKET OVERVIEW

This chapter provides an overview of the residential market across the study region, findings from consultation with real estate agents, residential development pipeline and sales data analysis.

3.1 Consultation

Local Agent Consultation

Recent sales by local agents were typically lots sized between 800-1,100 m², within residential subdivisions in Griffith. These lot sizes match buyers' preferences, with most purchases seeking residential lots of these sizes. Within Darlington Point there is a preference for larger lots of 1,100 m² and above, with an identified lack of lots sized between 1,500-2,000 m².

Residential development within the area is constrained by the local construction industry is which is currently exceeding its capacity. This leads to a bottleneck in housing supply. Specifically, in Darlington Point planning constraints further decrease the rate of residential development. For example, some builders are unable or unwilling to engage in the area due to potential land quality issues and ongoing maintenance concerns.

The agent's view was that the market does not see residential land in Darlington Point as a substitute for in the equivalent Griffith and even less so for Leeton, with potential buyers seeking larger lifestyle lots within Darlington Point. Further concerns about the higher construction's costs mean that buyers are less likely to see residential lots within Darlington Point as a substitute for Griffith.

Council Officer Consultation

Consultation with council planners at Habitat Planning advised that there was limited additional supply of residential land currently ready for development in Darlington Point, it is noted however that there exists a vast stock of land ready to be subdivided which has not been over the past several years and it no expected to be.

There has been some small scale development along Britts Road beyond the south west edge of Darlington Point (UCL), this land is primarily larger lots of an average of 2ha. There is additional land identified for supply along Britts Road outside of Darlington Point (UCL), this land however still requires earth works prior to development.

3.2 Supply Pipeline

Council Specific Development Applications

Recent development activity within Murrumbidgee council are identified in Table 1, there were 5 dwelling approvals issues since May 2017. Most of these developments have occurred outside of the Darlington Point (UCL) with only 2 applications in the study area and the remainder of the applications dispersed across the surrounding regional areas.

TABLE 1: RECENT RESIDENTIAL DEVELOPMENT IN DARLINGTON POINT

Date of Approval	Type of Building	Area
18/08/2016	Construction of Dwelling	Darlington Point (UCL)
13/01/2017	Dwelling	Darlington Point Rural
30/05/2017	Dwelling	Darlington Point (UCL)
27/03/2018	Dwelling & Garage	Darlington Point Rural
18/10/2017	Construction of 2 New Dwellings	Darlington Point Rural

Source: Murrumbidgee Council

ABS Building Approvals Data

Figure 3 presents the monthly ABS (July 2016 – May 2019) new residential building approvals data for the study region separated between Houses and other dwellings.

FIGURE 3: STUDY REGION RESIDENTIAL BUILDING APPROVALS JULY 2016-MAY 2019

Source: ABS Building Approvals 8731.0, May 2019

Most building approvals are located within Griffith(C) and are primarily House approvals, the data shows somewhat consistent levels of home approvals within Griffith averaging 6.6 house approvals per month over the time series and an additional 1.8 other dwelling approvals per month.

Other regions such as Murrumbidgee show sporadic and less consistent results, with gaps of up to 6 months without a residential building approval at some points in the time series. This suggests that there is not a great dealing of underlying construction activity within the municipality. Murrumbidgee average 0.6 house building approvals per month over the time series and 0.1 other dwelling approvals.

Leeton averages 1.8 House approvals per month and 0.3 other dwelling approvals per month over the time series.

Cordell

An examination of the future supply pipeline for residential development was conducted using the CoreLogic Cordell Connect database. The Cordell database includes information on current and potential development projects, from those currently under construction to projects in the initial planning stages.

Within the database, each project has been classified according to its stage of progression. The data has been organised into the following categories:

- Group 1: Commenced and firm projects – projects where construction has commenced, or projects listed as being ‘firm’ (typically projects where site works have commenced but where construction is yet to begin).
- Group 2: Approved projects – projects which are not listed as commenced or firm, but which have received planning approval. Where projects have been approved but are listed in the database as deferred or abandoned, they are allocated into groups 3 and 4 respectively.
- Group 3: Possible projects – all other projects listed in the database, except for those listed as being abandoned. These are typically projects which are in the design and planning stages, projects which have had their planning applications refused, or projects which have been deferred.
- Group 4: Abandoned projects – these are projects which listed as being abandoned by the proponent for any reason.

The number of dwellings and capital value of works in the study region LGAs (Local Government Area) are shown below in Table 1.

TABLE 2: HOUSING SUPPLY PIPELINE – PLANNED UNITS AND CAPITAL VALUE OF DEVELOPMENT

	Commenced/Firm projects	Approved projects	Possible projects	Abandoned projects
Dwellings	112	11	505	7

3.3 Sales Data Analysis (observed demand)

Data gathered from historical sales aggregation platform RP data, assist in providing insights into data based trends within the study region. Figure 4 contains home sale volumes for the study region from 2010-2019 (March). As can be seen in the graph there has been a decline in exchange volumes across the region from 2010 to 2017/18 with recent increases in transaction in Griffith and Leeton.

Despite these changes in the nearby population centres, Darlington Point (UCL) has not seen the same level of transaction increase and has remained relatively flat in comparison to the other study areas.

FIGURE 4: STUDY REGION HOUSE SALE VOLUMES 2010-2019

Source: RP Data 2019

Following on from house sale volumes Figure 5 contains land sales volumes within the study regions. Figure 5 shows that Griffith and Leeton have seen high volatility across the data period, 2010-2019, whilst Darlington Point has not followed these trends. Spikes in land sales volumes are typical as transactions spike when new subdivisions are released.

Recent uplift in Griffith suggest that new land has been released in late 2018/2019 to address potential shortfalls in residential land, which may ease constraints in the housing markets of Griffith and Leeton.

FIGURE 5: STUDY REGION LAND SALE VOLUMES 2010-2019

Source: RP Data 2019

Figure 6 contains median house price data for the study regions from Jan-2015 to Mar-2019, with the dotted lines representing the trendline for each area respectively. From the data we can see ongoing price increases in home prices across Griffith and Leeton, with trends across the last 6-months trending upward.

Across the same period there has been stagnation of house prices within Darlington point, contrary to the upwards trend in the other study areas.

FIGURE 6: STUDY REGION MEDIAN HOUSE PRICE 2015-2019

Source: RP Data 2019

3.4 Key Insights

- Local agent **consultation** indicated a preference for larger lifestyle lots in Darlington Point over residential sized lots
- Supply pipeline** (Cordell) and ABS building approval data indicate a preference to develop within Griffith
- It is unlikely given the various sources of data that participants within the local **market** view houses within Darlington Point as a substitute for houses/land within Griffith or Leeton.
- The lack of co-movement in **sales** volumes and house prices indicate that Darlington Point exists within a separate regional market to that of Griffith and Leeton.
- Stagnant price trends in Darlington Point suggest lack of underlying demand for residential land

4. DEMAND ASSESSMENT

This section explores underlying demand patterns of population and preference in lot sizes within Darlington Point and the Study region. The section identifies how population growth patterns will influence demand for residential land within Darlington Point.

4.1 Population Growth

Local Migration Patterns

Population growth is made of two main components natural increase (Births + Deaths) and net migration. Using ABS data collected in the 2016 Census of Households and Population, we can identify the different types and origins of recent migration to the study area. This will assist in understanding what type of residential users are entering the local market.

Data on the movement patterns across the study area are identified in Table 3, cross sectioning each of the municipalities within the study region with the migration type.

The table shows that there was an estimated net migration of 942 persons within the study region, with the majority of this fuelled by migration from overseas sources. With negative (more out than in) migration of 637 persons to other states and a small positive migration amounting to 153 persons from within NSW.

TABLE 3: 2016 ABS PLACE OF USUAL RESIDENCE MIGRATION DATA

	Intrastate	Interstate	Overseas	Total
Immigration				
Darlington Point	120	39	5	164
Murrumbidgee (A)	412	220	60	692
Leeton (A)	1,109	350	220	1,679
Griffith (C)	1,561	659	1,146	3,366
Study Area Total	3,082	1,229	1,426	5,737
Emigration				
	Intrastate	Interstate	Overseas	Total
Murrumbidgee (A)	488	224	-	712
Leeton (A)	975	450	-	1,425
Griffith (C)	1,954	1,192	-	3,146
Study Area Total	2,929	1,866	-	4,795
Net Migration				
	Intrastate	Interstate	Overseas ¹	Total
Murrumbidgee (A)	-76	-4	60	-20
Leeton (A)	134	-100	220	254
Griffith (C)	-393	-533	1,146	220
Study Area Total	153	-637	1,426	942

Source: 2016 ABS Census of Population and Households

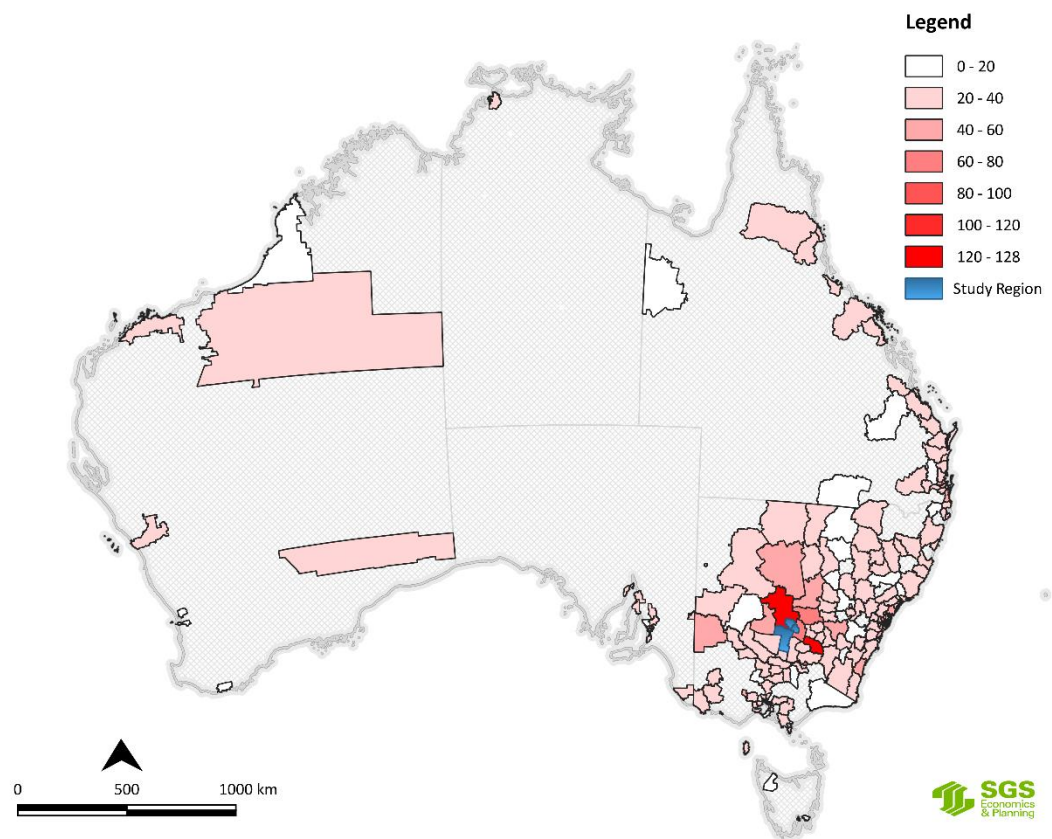

¹ The ABS does not record Emigration data for persons who have left country

The immigration patterns of new residents are displayed spatially below in Figure 7: Domestic Migration Origin by LGA, for the Study area as whole, indicating the origins of recent domestic migrants to the study region.

The spatial data indicates that most of the immigration to the study region comes from Intrastate sources, with the bulk of these movement originating from nearby regional municipalities such as Wagga Wagga (C) with 126 immigrants to the study area and Carrathool (A) with 126 Immigrants to the study area.

Movement from interstate regions includes sources such as East Pilbara (S) and Kalgoorlie/Boulder (C) in Western Australia and Mareeba (S) and Whitsunday (R) in Queensland.

FIGURE 7: DOMESTIC MIGRATION ORIGIN BY LGA

Source: SGSEP 2019

Given that largest source of net migration² was overseas persons, it is important to classify the origins of these persons.

Table 4 identifies migrant arrivals between 2011 and 2016, by their place of birth.

The data indications that the most common place of birth for new overseas arrivals was India with 244 persons newly residing within the study region. This was followed by Philippines (128), Taiwan (1020 and Afghanistan with 87 new persons.

The majority (80% or 935 persons) of the migration occurred to the Griffith (C) municipality, Leeton (A) had an additional 174 international migrants and Murrumbidgee (A) had 47 new international migrants.

² There is no overseas net migration as place of usual residence data only counts persons within Australia

TABLE 4: INTERNATIONAL MIGRATION ORIGIN (TOP 12 ORIGINS), 2011-2016 ARRIVALS

	Griffith (C)	Leeton (A)	Murrumbidgee (A)	Total

Estimated Residential Population, Past and Future

Estimated Residential Population

Resident population growth is one of the main factors contributing to demand for residential land, as population increases so does the need to house the new people. The Estimated Residential Population (ERP) data series is produced by the ABS and is the official government estimates of population in a geography.

From 2006-2016 Murrumbidgee and Leeton have shown overall decreases in the number of residents over the 10-year period from 2006-2016 (-290 and -155 respectively) whilst Griffith has experienced the opposite trend (+1906). This data is identified in Table 5, along with the regional NSW data as a performance benchmark

TABLE 5: STUDY REGION POPULATION TOTALS AND GROWTH RATES (2006-2016)

	2006	2011	2016	2006-2016	CAGR
Regional NSW	2,486,529	2,609,580	2,707,935	221406	0.86%
Murrumbidgee	4,219	3,888	3,929	-290	-0.71%
Griffith	24,450	25,395	26,356	1,906	0.75%
Leeton	11,562	11,406	11,407	-155	-0.13%

Source: stat.data.abs.gov.au

Griffith has experienced a similar growth rate in comparison to Regional NSW whilst Murrumbidgee and Leeton have both had negative growth.

Population estimates for Darlington Point are also available using summation of SA1 ERP figures for the three SA1's which comprise Darlington Point (UCL)³. The ABS estimated the population of Darlington Point in 2018 of 901 persons and from 2011-2016. The town declined by an estimated 100 persons and a further 50 persons between 2016 and 2018. This data is identified in Table 6 on the following page.

³ The three SA1's which comprise Darlington Point (UCL) are: 1125731, 1125732 and 1125733

TABLE 6: DARLINGTON POINT POPULATION TOTALS AND GROWTH RATES (2011-2018)

	2011	2012	2013	2014	2015	2016	2017	2018	11-16	CAGR
Darlington Point	1,055	1,024	1,027	999	939	953	923	901	-102	-2.23%

Source: ABS Estimated Residential Population

Although Murrumbidgee experienced an overall negative growth level between 2006-16, there was growth of an additional 40 people between 2011 and 16. However, over the same period Darlington Point declined in population by approximately 100 people. Suggesting that any growth in Murrumbidgee is not likely to occur within Darlington Point.

Population Forecasts

There are no official population projections provided for Darlington Point, with the Department of Planning and Environment (DPE) providing LGA level projections as the lowest geography. The projections for the study region are identified below in Table 7.

TABLE 7: DEP STUDY REGION MAIN SERIES POPULATION PROJECTION (2016-2036)

	2016	2021	2026	2031	2036	16-36	CAGR
Griffith	25,950	26,250	26,350	26,300	26,150	+200	0.04%
Leeton	11,750	11,850	11,900	11,850	11,700	-50	-0.02%
Murrumbidgee	3,700	3,550	3,400	3,300	3,150	-550	-0.80%

Source: Department of Environment and Planning

From this table DPE expects moderate growth of 200 persons in Griffith, a small decline of 50 persons in Leeton and a large decline of 550 person in Murrumbidgee.

DPE projections are provided in three types (Low, Medium and High) for each region. The DPE population projections for Murrumbidgee are identified in Table 8 below by series type.

TABLE 8: MURRUMBIDGE POPULATION PROJECTION (2016-2036)

	2016	2021	2026	2031	2036	16-36	CAGR
Low	3,700	3,500	3,300	3,150	2,950	-750	-1.13%
Medium	3,700	3,550	3,400	3,300	3,150	-550	-0.80%
High	3,700	3,600	3,500	3,450	3,400	-300	-0.42%

Source: Department of Environment and Planning

The projections from DPE estimate there will be a population decline across Murrumbidgee for all scenarios. The low growth scenario estimated 750 people leaving the region or an approximate 20% decline in population the medium scenario estimates a decline of 550 persons, or 14% population decline, and the High growth scenario estimated decline of 300 persons or 8% population decline.

Similarly, SGS has produced projections for Darlington Point over the same period, using data from the ERP and DPE population projections. Under four different scenarios, Darlington Point is forecasted to have negative to minimal growth over the 2011-2036 period. These scenarios are identified on the follow page in Table 9

With the trend based (Recent ERP growth apportioned to LGA projections) Darlington Point is expected to contract by a further 100 people to 2036 reaching a population of 853. Under the medium growth scenario (5 additional population per year), population growth of 0.5% of 100 people overall would see Darlington Point recover to population level of 1,053 roughly the

population in 2011. A high growth scenario (10 additional population per year) would see population grow by 200 people to 2036 and each a population peak of 1,253 persons.

TABLE 9: DARLINGTON POINT POPULATION (2016-2036)

	2016	2021	2026	2031	2036	16-36	CAGR
Trend based	953	928	903	878	853	-100	-0.55%
No Growth	953	953	953	953	953	0	0.00%
Medium Growth	953	978	1,003	1,028	1,053	100	0.50%
High Growth	953	1,003	1,053	1,103	1,153	200	0.96%

Source: SGSEP 2019, based on DEP NSW Population projections

Based on current patterns within the region the most likely of these four scenarios to occur are the trend based or no growth scenarios, with limited projected population growth across the broader region and lack of evidence that Darlington Point would feed of growth in Griffith. The forecasts scenarios suggest that there will be a further population decline following the pattern of consistent population decline in Darlington Point over the last 7 - years (2011-2018).

4.2 Observed Preferences

Transaction Data

Data extracted from RPdata for Darlington point between 2006 and 2016 indicate the type of land transactions that have occurred over this period. This data can assist in providing an insight into the likely lot sizes the market considers suitable for the area.

Figure 8 contains this data and is displayed in incremental lot sizes from below the minimum lot size for Darlington Point according to the Murrumbidgee LEP, up to land transaction above 2500m².

The data indicated a preference of lots sizes between 1,000-1,500 m² and between 2,000 - 2,500 m² as the most commonly transacted types. The least common type was lots sized below 600 m², likely a result of the LEP subdivision provisions.

FIGURE 8: DARLINGTON POINT LAND TRANSACTIONS BY LOT SIZE 2006-2016

Source: RPData 2019

Lot Consumption Data

Observed land use patterns from aerial imagery over several years identifies observed preferences in the study region. The distribution of lot consumption by size provides insight into buyer preferences, with the additional fact of the land being consumed (dwelling constructed) where in transaction data a single vacant lot may be transacted multiple times prior to construction.

Figure 9 identifies the lot consumption data in Leeton, from the graph it is easy to see a clear preference for lots sized between 1,000-1,500 m² with 112 observed consumptions over the reference period. The next most common lot preference in Leeton was 2,500 m² and above with approximately 20 lot consumptions over the reference period.

FIGURE 9: LEETON LAND CONSUMPTION BY LOT SIZE 2012-2018

Source: RPData 2019

Figure 10 contains the same distribution for lot consumption in Griffith, the data indicates a clear preference for lots between 600-1,000 m² with over 285 lots consumed of this size over the reference period. There was roughly even distribution over lots sized between <600 m², 1,000-1,500 m² and 2,500 m² across the same time frame with approximately 40 lots consumed in each band.

FIGURE 10: GRIFFITH LAND CONSUMPTION BY LOT SIZE 2011-2018

Source: RPData 2019

4.3 Key Insights

- There has been net emigration from Murrumbidgee between the last two census', with much of the local population heading to nearby larger regional centres.
- There was a net migration of 945 people between 2011-16 discounting overseas movers across the study region, with most of the migration focused in Griffith and Leeton.
- There has been significant population declines within both Darlington Point (UCL) and Murrumbidgee (A) in recent history.
- The official state population projections indicate that there will be limited population growth in the region, and this constrain the ability for Darlington Point to grow.
- Population forecasts produced by SGS identify a trend based scenario or no growth scenario as the most likely outcomes for Darlington Point (UCL)
- There is observed preference of large land sizes in Darlington Point (UCL). This is the lot sizes that are identified in the proposal.

5. TAKE-UP ANALYSIS

This section explores the current land consumption patterns across the study region, with a focus on urban areas. This data is then coupled with estimated land available for residential development to identify a supply figure for each type of residential land in the study region.

5.1 Land Consumption

Using Aerial imagery, SGS has undertaken a lot count to identify land consumption trends in the study region. This process assists in identifying trends in land consumption patterns that can be difficult to infer from sales volumes and planning approvals alone.

For example, a development approval may identify a new construction, but not identify whether an existing structure was demolished in order to construct it. In this case, this would not count as land consumption as the lot was already fully utilized for this purpose.

Similarly, sales volumes can only account for the transaction of land and do not identify whether the land is utilised for residential purpose, on-sold or left vacant.

Background Data

One of the key aspects of undertaking this type of analysis is defining a timeframe suitable to undertake the analysis, too long between reference points and you fail to capture recent trends and too short timeframes will lead to failure to identify long term trends. For this study SGS has chosen to take a reference period of approximately 7-8 years (dependent on aerial timeframe) in order to capture housing market trends consistent with data presented in other sections of the report. The relevant aerial reference times are identified in Table 10: Study Area Aerial Reference Points.

TABLE 10: STUDY AREA AERIAL REFERENCE POINTS

Study Area	Start	End	Source
Leeton	12/11/2012	20/12/2018	Google Earth
Darlington point	12/11/2012	20/12/2018	Google Earth
Griffith	23/01/2011	28/08/2018	Nearmap

Source: SGSEP, 2019

It is also important to identify how potential residential land will be used, ideally based on its zoning. Using data interpreted from Local Environmental Plan 2014 (LEP) for each study area, SGS has estimated the outcome of land supply following development for each study region.

This data is contained in Table 11 and identifies minimum lot sizes, subdividable lots and Major Subdivisions. This is done to identify land which will need to undergo certain levels of development (roads, drainage, green space etc.) prior to residential use, this process is simplified utilizing benchmarks which proportion part of the land supply for these uses.

The mechanism through which this is apportioned is as follows:

- Lots between the minimum lot size and subdividable lot attribute 100% of their area to the aggregated land supply,
- Lots which are sized between the Subdividable Lot and Major Subdivision classification count 85% of their area to the land supply and;

- Lots greater than the Major Subdivision only count 70% of their area to the land supply.

TABLE 11: RESIDENTIAL LOT SIZES BY ZONE (HA.)

	Minimum Lot Size	Subdividable Lot	Major Subdivision
Leeton (UCL)			
General Residential (R1)	0.075	0.15	0.8
Medium Density Residential (R3)	0.05	0.1	0.2
Low Density Residential (R2)	0.12	0.4	2

General Residential (R1)	0.07	0.15	0.5
Large Lot Residential (R5)	0.3	0.6	2
Village (RU5)	0.7	0.15	0.5

Source: SGSEP, 2019 with LEP data

Land Consumption

Recent land consumption for each of the study areas is identified in Table 12⁴ Across the reference period there was a total of 71.3 ha of land consumed across the entire study region. Most of the land consumed located in either Griffith (62.2%) or Leeton (37%). This means that less than 1% of residential land consumption has occurred within Darlington Point across the reference period.

Most land consumption in Griffith was of General Residential (R1) zoning and in Leeton the most common type of land consumption was Low Density Residential (R2).

TABLE 12: LAND CONSUMPTION BY STUDY AREA AND ZONE (HA.)

Zone	Land Consumption
Leeton (UCL)	
General Residential (R1)	3.92
Medium Density Residential (R3)	0.77
Low Density Residential (R2)	17.07
Large Lot Residential (R5)	4.64
Total	26.40
Darlington Point (UCL)	
Village (RU5)	0.54

Village (RU5)	2.97
Total	44.36

Source: SGSEP, 2019

⁴ This data is displayed Spatially in Figure 16, Figure 18 and Figure 20 in appendix

Vacant Land

Vacant land for the purposes of residential housing has been identified in Table 13⁵ by study area and land zoning. In order to be considered vacant the identified lot must either have no existing dwelling on it, be of sufficient size, in proximity to other residential areas or structured in a way that indicates it is in supply (a 2 ha. Lot with a single dwelling in corner and remaining land not utilized for production).

A total of 492.02 ha of vacant residential zoned land was identified across the study region with a split of 59.1% in Griffith, 36.5% in Leeton and 4.3% in Darlington Point.

In Griffith the most common type of vacant land was General Residential (R1) and in Leeton the most common type was Low Density Residential (R2).

TABLE 13: VACANT LAND BY STUDY AREA AND ZONE (HA.)

	Minimum Lot Size	Subdividable Lot	Major Subdivision	Total
Leeton (UCL)				
General Residential (R1)	2.42	1.11	21.76	25.29
Medium Density Residential (R3)	0.00	0.44	0.00	0.44
Low Density Residential (R2)	1.16	0.00	108.53	109.69
Large Lot Residential (R5)	0.00	2.10	42.28	44.38
Total	3.58	3.65	172.57	179.80
Darlington Point (UCL)				
Village (RU5)	1.64	9.37	10.31	21.32
Griffith (UCL)				
General Residential (R1)	10.64	2.83	202.82	216.29
Large Lot Residential (R5)	3.29	0.81	51.06	55.15
Village (RU5)	0.00	0.86	18.60	19.46
Total	13.93	4.50	272.48	290.91

Source: SGSEP, 2019

⁵ These are also identified spatially in Figure 15, Figure 17 and Figure 19 in appendix

Estimated Supply

Taking the estimated land consumption and identified vacancy data in combination it is possible to estimate the likely supply of residential land for the region.

This data is identified below in Table 14, according to the data there is an estimated 3,005 lots worth of residentially zoned land within the study region with approximately 2,203 lots worth of vacant residential land located within Griffith, 677 lots worth of land in Leeton and 126 worth in Darlington Point.

Most of the potential residential land in Griffith will come from General Residential (R1) zoned land and Leeton will primarily come from Low Density Residential (R2) zoned Land.

Given recent consumption patterns of land in Darlington Point there will be a supply of 126 lots, which is consistent with the trend that is expected to approximately 192 years. Land consumption in Darlington Point (UCL) would need to increase 10 fold to reduce the supply of land to less than 20 years.

TABLE 14: ESTIMATED SUPPLY OF RESIDENTIAL LAND STUDY REGION BY ZONE

	Average Lot Consumption Size (Ha.)	Vacant Land Yield (Ha.)	Supply (Lots)	Supply (Years)
Leeton (UCL)				
General Residential (R1)	0.13	18.60	146.93	28.93
Medium Density Residential (R3)	0.11	0.38	3.41	2.98
Low Density Residential (R2)	0.17	77.13	451.78	27.57
Large Lot Residential (R5)	0.42	31.38	74.47	41.32
Total	-	127.48	676.61	-
Darlington Point (UCL)				
Village (RU5)	0.13	16.82	125.60	191.62
Griffith (UCL)				
General Residential (R1)	0.08	155.02	1,940.37	34.73
Large Lot Residential (R5)	0.36	39.71	109.44	17.12
Village (RU5)	0.09	13.75	153.04	28.30
Total	-	208.49	2,202.85	-

Source: SGSEP, 2019

These estimates are in line with data that was identified within the Darling Point Structure Plan 2017, these estimated are identified below in Table 15.

TABLE 15: EXISTING LAND SUPPLY UNDER HISTORIC GROWTH (2 LOTS PER ANNUM)

Lot Type	Total Area	No. of Additional Lots	Years Supply
Standard Residential (600m ²)	40.85ha	340.4**	170.2
Large Lot Residential (2ha+)	67.29ha	23.6	11.8
Total	108.14ha	364	182

Source: Darlington Point Structure Plan Author: Habitat Planning, 2017

6. DISCUSSION SECTION

6.1 Case Studies

Three case study examples have been chosen as potential large lifestyle lot development scenarios. The sites chose are identified in Figure 11, Figure 12 and Figure 13.

Estate composition

Table 16: Case Study Development attributes Table identifies various development attributed of the case study estates, with comparison to the proposed structure of the residential expansion in Darlington Point.

The total land size for each of these estates range from 9.07 ha to 22.1 ha, however there are similarities in the amount of land which is allocated to local infrastructure (common land) such as roads, drains, curbs and other. The share of common land in the three case study areas ranges from 7-11% which is dependent on estate layout.

TABLE 16: CASE STUDY DEVELOPMENT ATTRIBUTES TABLE

	Average Size	Median Size	Lots	Residential Area	Total Area	Common Land	Common Share
Melville Cres Griffith	5,343	4,586	21	112,198	121,104	8,907	7.4%
Lansdowne Rd Leeton	4,320	4,005	21	90,719	101,595	10,876	10.7%
Serencroft Dr Leeton	6,710	6,406	33	221,451	237,838	16,386	6.9%

Source: SGSEP, 2019

A hypothetical Rural Lot in which the Darlington Point proposal follows the trends in the case study estates is identified in Table 16: Case Study Development attributes Table with the common share of land set to the average across the three case studies. A lot size of 2,500 m² is chosen as the testing value to identify potential lot yield of the site, this is the next most common sized lot transacted from the demand assessment in Figure 8: Darlington Point land Transactions by Lot Size 2006-2016, this scenario would yield approximately 29 lots.

TABLE 17: DARLINGTON POINT DEVELOPMENT ATTRIBUTES TABLE

	Average Size	Median Size	Lots	Residential Area	Total Area	Common Land	Common Share
Proposed Darlington Point	938	912	56	52,530	79,340	26,810	33.8%
Lifestyle Lot Scenario	2,500	2,500	29	72,741	79,340	6,598	8.3%

Source: SGSEP, 2019

Estate Take-up

Take-up rated within the case study areas are identified in Table 18, with the hypothetical Darlington Point scenario following averaged development patterns across the three case studies. The patterns from the development of these estates indicate a stronger take-up rate at the beginning of the subdivision compared to the full completion time-line.

The method for identifying how these estates develop is whether the demander (purchaser) of the lot goes on to build on the land, otherwise if the land is transacted again and the built upon at that point it is considered taken-up. This is narrow in on how long the estates take to

“fill-out” and disregards any effects of speculator investment or other exogenous factors outside latent demand for this type of large lot residential demand.

Based on the patterns exhibited in these estates, if the hypothetical lifestyle lot Darlington Point scenario happened, then 50% of the land may be undertaken over the first four years after construction, with the remaining lots being consumed over the follow 11 years.

TABLE 18: TAKE-UP RATE IN CASE STUDY AREAS

	Start	Halfway (Median)	End (or Ongoing)	Development Time	Lots P.A Phase 1	Lots P.A Total
Melville Cres Griffith	2000	2003	2016	16	3.5	1.3
Lansdowne Rd Leeton	2006	2012	2019	13	1.8	1.5
Serencroft Dr Leeton	2000	2004	2015	15	4.6	2.1

Whitton Development EOI

In February 2019, Leeton Shire Council identified a parcel of land in the town of Whitton located 17km to the North-East of Darlington Point. The residential subdivision was for 22 lots with an approximate average size of 1,255 m², the project was put out to EOI to developers, builders and potential purchasers but failed to garner sufficient interest to justify the subdivision. The implications of the project's outcome and its proximity to Darlington Point, provides a clear regional example of the viability of the proposed Darlington Point project.

The layout of the proposed development in Whitton is identified below in Figure 14.

FIGURE 14: PROPOSED WHITTON DEVELOPMENT

Source: Leeton Shire Council

6.2 Key Insights

- The life cycle of a large lot estate across the region from beginning to end is approximately 15 years, with a large proportion of lots sold within the primary marketplace being built upon thereafter.
- There is a higher yield of total land for larger lot estates in comparison to the current Darlington Point proposal, with lifestyle estates averaged approximately 8.3% of total land for infrastructure and common space versus 33.8% of land under the current proposal.
- Reduced capital costs, would result in a lower break-even price for council in terms of price per m², based on recent sales data in Darlington Point the construction costs would need to be reduced by approximately 40% or more in order for the project to break even (under a life style lot scenario), significantly lower than the \$55.17 per sqm to break even under the current proposal.

7. CONCLUSIONS

Local Market

Consultation with a Local Real Estate agent informed the preferences in Darlington Point are for larger lots (when available) and that smaller residential lots are primarily sold within Griffith.

Most building approvals are happening in Griffith, there is a very low volume in Darlington Point, and this will likely not change without a substantial shift within market conditions. Cordell data points to pipeline activity located within Griffith, this may be due to the capital costs of projected not meeting criteria or other reasons.

There is no clear co-movement in Darlington Point and Griffith for both sales volumes and prices. Price in Darlington Point have remained at this point and have trended down recently, whilst Griffith and Leeton and gone up. This suggests lack of underlying demand for residential land within Darlington Point.

Demand Assessment

There is no population based argument to suggest there is unmet demand in Darlington Point for additional residential land. Negative population growth and a net outflow of migrants (Intrastate and Interstate), along with population projections provided by DEP suggest that over the next 20 years there is likely to be less people living in Darlington Point.

Population projections contained within the Darlington Point Structure plan, do not reflect current population trends and there is little evidence that a capacity led population projection is appropriate for Darlington Point.

Observed preferences in lot size data trend to larger lots than those identified in the current proposal, with 1000-1500 m and 2000-2500+ the preferred types, lack of historical demand for the proposed product is the best evidence for potential future demand.

Take-Up Analysis

Take-up analysis suggests there is already excess supply of residential land in Darlington Point and that there is also ample supply in Griffith and Leeton to address any potential shortfalls. The Darlington Point structure plan 2017 also suggested this and included potential land outside of the Darlington Point (UCL) which is not considered in this analysis.

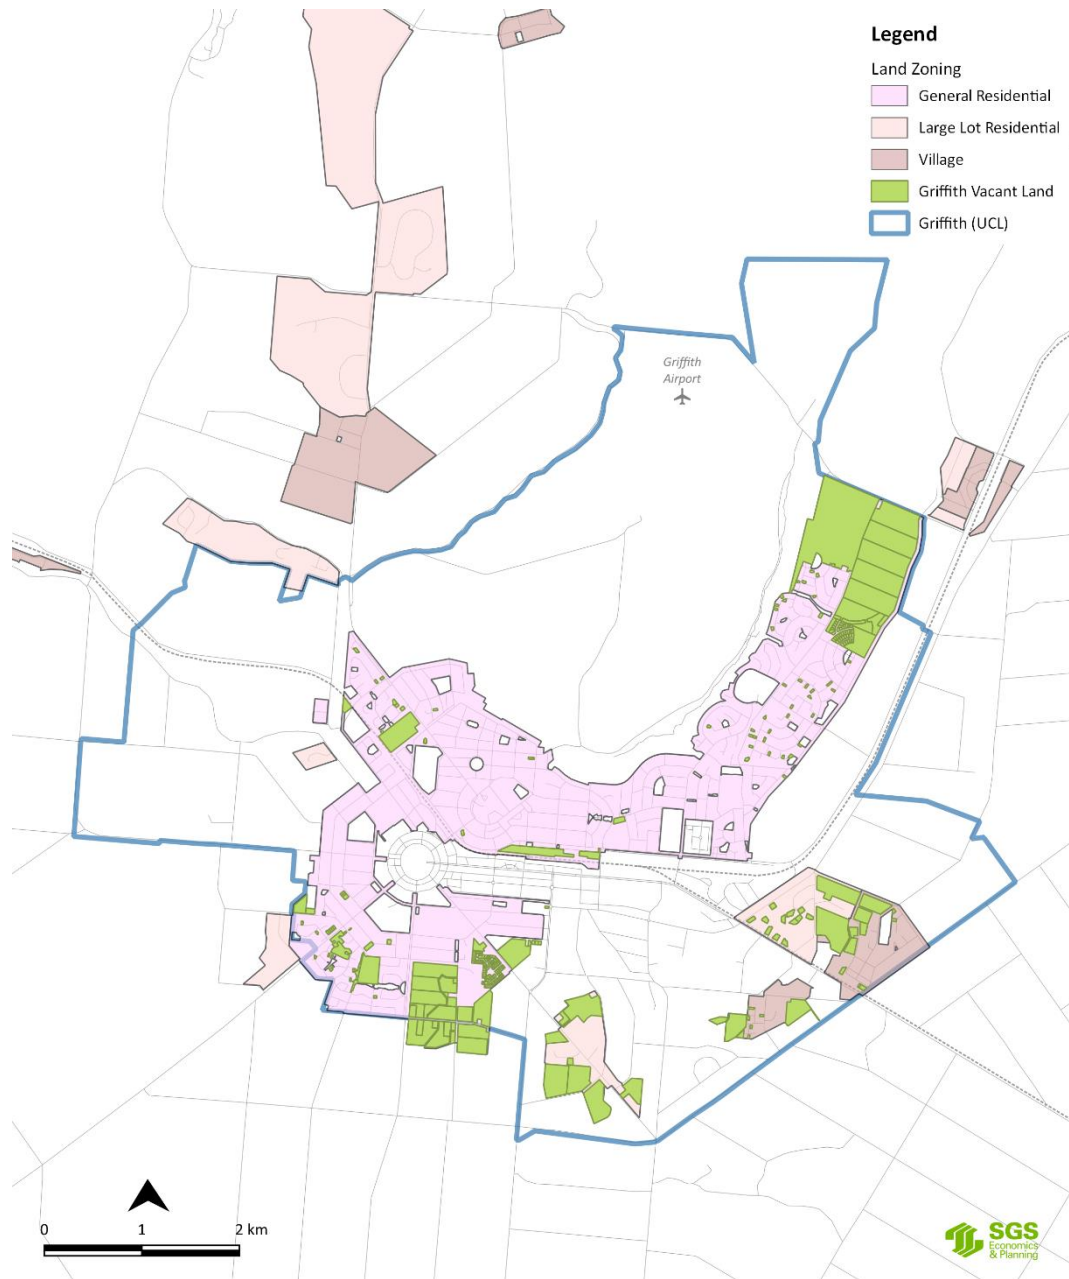

Discussion

Case studies suggests that larger lots likely are more viable and have an approximate development timeline of 15 years. Most lots would likely sell to people looking to build in the area, with an estimate of approximately 50% of lots being purchased to be built upon in the first four years (with a construction lag).

Pricing of the subdivided lots under a lifestyle lot scenario would result in a lower required selling price per m² of land assuming construction costs are lower. This option would present a less capital intensive option and therefore less risky solution to council.

Water Availability and Use

How do we use our water?

Murrumbidgee system

...Documents\Research\TMS\WetlandZoneMap2.mxd

Australian Government

Commonwealth Environmental Water Office

Water use in the Murrumbidgee in 2018-19

Entitlements	758 GL
Long Term Average Annual Yield	407 GL
2018-19 use	62 GL

- Dry year with very low allocations
 - achieved 16 watering actions
- Key highlights:
 - Southern bell frog breeding events (Nimmie-Caira)
 - 5 waterbird rookeries (Lowbidgee and Yarradda)
 - Environmental water use prevented large fish death events (lower Murrumbidgee)

Australian Government

Commonwealth Environmental Water Office

Watering plans for this year in the Murrumbidgee

- Very dry year with very low allocations
- Objectives
 - Protect key refuge sites in wetlands (eg: Fivebough and Tuckerbil)
 - Protect threatened species
 - Support migratory water bird habitat
 - Maintain vegetation
 - Manage holdings for the future

2019-20 Allocation	51.7 GL
Carryover Total (post evaporation loss)	47.1 GL

Water use scaled for seasonal conditions (examples)

Example location	Demand for water	Conditions			
		Very dry	Dry	Moderate	Wet
Mid-Murrumbidgee wetlands	Pumping up to 16 GL to individual sites for refuge habitat and wetland vegetation	Avoid damage: support critical fauna and flora habitat requirements	Protect and ensure capacity for recovery: Support survival of waterbirds and native aquatic species including fish, turtles, frogs and invertebrates.		Option unlikely to be required under these conditions (natural inundation)
Lowbidgee - Yanga National Park	Up to 30 GL wetland and 10 GL rookery	Option a priority but unlikely (not enough water)	Protect and ensure capacity for recovery: maintain and improve wetland vegetation diversity and condition; provide habitat to support survival of native fish, waterbirds and other aquatic species like frogs; provide hydrological connectivity.		Bird breeding event contingency: Maintain wetland water levels and acceptable levels of water quality for a naturally-triggered breeding event.
Lowbidgee Full System Floodplain Watering	Up to 393 GL of Lowbidgee supplementary allocations will be prioritised for use if made available.	Supplementary water not available under these conditions			
					Improve or maintain the character, condition and resilience of floodplain vegetation communities. Basin-wide waterbird habitat & future population recovery.

Currently ~ here

The types of outcomes our water has achieved

- More than 750 watering events in the last 4 years
- Iconic Murray Cod breeding in large numbers in the Lower Darling
- Helped bring endangered species back from near extinction (eg Murray Hardyhead)
- Helped waterbird populations recover in sites like Booligal and the Macquarie Marshes
- Kept freshwater flowing to the Coorong from the River Murray for over two years
- Sustained native fish in the Northern Basin
- Provided critical relief for communities during the drought

PUB19/426, © State of New South Wales through Department of Planning, Industry and Environment 2019. The information contained in this publication is based on knowledge and understanding at the time of writing (August 2019). However, because of advances in knowledge, users are reminded of the need to ensure that the information upon which they rely is up to date and to check the currency of the information with the appropriate officer of the department or the user's independent adviser.

Acknowledgement of Country

The Department of Planning, Industry and Environment acknowledges that First Nations peoples are the traditional custodians of the Murray–Darling Basin. The department pays respect to Elders past, present and future and acknowledges their deep cultural, social, environmental, spiritual and economic connection to their lands and waters. We also recognise the unique, diverse and enduring knowledge of First Nations peoples.

Acknowledgement

We acknowledge the independent and frank advice given by the Yanco Creek and Tributaries Advisory Council Inc. (YACTAC) to help make this engagement with the community effective and genuine.

About this consultation draft

People are understandably interested when there are changes proposed to the waterways they use and value. This consultation draft offers ideas about how people can influence future decisions about and outcomes from two sustainable diversion limit adjustment mechanism (SDLAM) projects that could affect the Yanco Creek System. Your feedback will be considered and used to shape the final engagement plan.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

Setting the scene

The Yanco Creek System links two of Australia's largest rivers—the Murrumbidgee and Murray—through over 800 km of interconnected waterways:

- Yanco Creek
- Colombo Creek
- Billabong Creek
- Forest Creek.

These local waterways support a large number of uses and values:

- domestic, stock and irrigation water supply for over 180 farms
- town water supply to Morundah, Urana, Oaklands, Jerilderie, Conargo and Wanganella
- recreation, such as fishing, waterskiing and photography

- First Nations cultural heritage, including opportunities for First Nations peoples to access and connect to Country
- historical significance associated with pastoralism and irrigation development
- biodiversity conservation, encompassing important wetlands and populations of threatened species.

Before dams and irrigation, Yanco Creek only connected with the Murrumbidgee River during floods and, as the name suggests, Billabong Creek was regularly reduced to deeper waterholes in summer.

Because of river regulation, these waterways became permanently flowing streams, with sections of still and fast flowing water, and deep and shallow water. Many native plants and animals are well adapted to the new water regime.

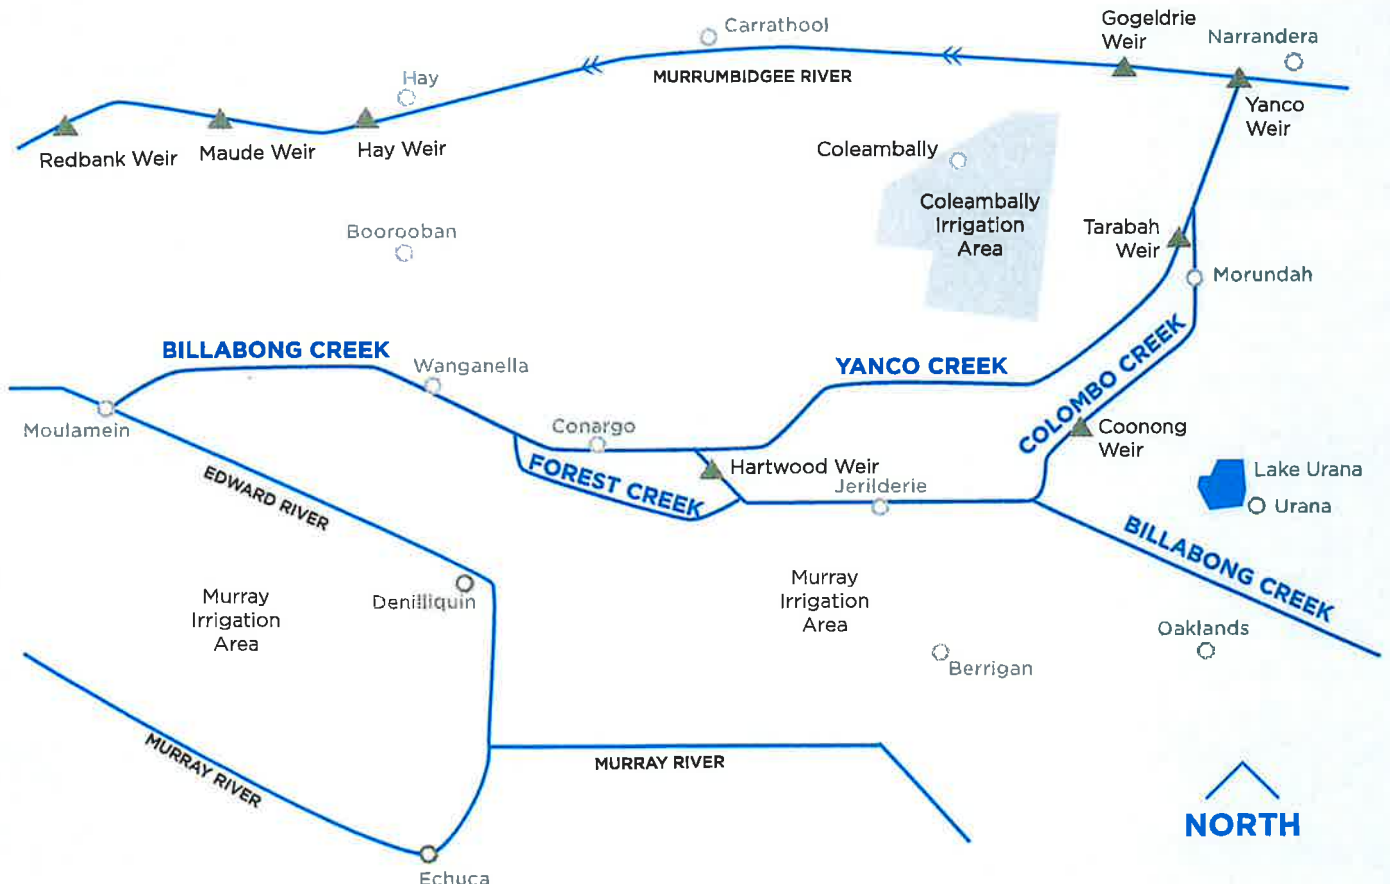

Figure 1: Yanco Creek system

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

Get involved—it's important!

This engagement plan provides information about how you can participate in the development of two SDLAM projects that could affect the Yanco Creek System.

The projects are:

- improved flow management works at the Murrumbidgee River–Yanco Creek offtake
- modernising supply systems for effluent creeks–Murrumbidgee River.

Find information on the Yanco SDLAM projects at industry.nsw.gov.au/water-yanco-creek

With your feedback we will design the projects to deliver the best possible results for all stakeholders, and make the largest acceptable contribution to the sustainable diversion limit (SDL) offset for the Murrumbidgee Valley. We can never expect 100% support but we will aim for a solid majority.

The proposed projects are not a done deal and alternatives to the current concept designs will be investigated, including the “do nothing” option.

About the SDLAM

The Basin Plan defines how much water can be taken from the Murray-Darling Basin while leaving enough to maintain the health of rivers, creeks, lakes and wetlands.

In order to achieve this balance, the Basin Plan aims to return 2,680 gigalitres of water to the environment—the total recovery target.

The Murray-Darling Basin Authority has determined that 605 gigalitres of the target can be offset through the SDLAM by way of projects that deliver equivalent environmental outcomes without requiring additional water to be removed from productive use.

- ✓ 286 gigalitres of the recovery target can be offset in NSW through the SDLAM
- ✓ 45% of water recovery in NSW has been through infrastructure projects
- ✓ 55% of water recovered in NSW has been through water purchased

The adjustment mechanism could provide an offset of 162 gigalitres across the Murrumbidgee Valley, which would mean that additional water purchases may not be necessary.

The Water division of the Department of Planning, Industry and Environment is the NSW lead for SDLAM projects.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

Our approach to community engagement

We are committed to effective and genuine engagement with the community because it will lead to better outcomes, improved service delivery and enhanced community satisfaction.

Our approach will:

- be holistic
- be co-designed
- be guided by advisory groups
- involve regular community contact
- ensure integrity
- be delivered through a local project team.

HOLISTIC

Delivery of the SDLAM projects has been separated into stages and gateways that will be open to public scrutiny:

- **Stage 1 is pre-construction.** A project agreement for Stage 1 funding was signed by the Australian and NSW governments in February 2019.
- **Stage 2 is construction.** There is no existing commitment by either government to enter a Stage 2 funding agreement for construction.

Governments will make an investment decision at the end of Stage 1 on whether to proceed to construction. The community will be informed of the decision, and the reasoning behind it.

We will approach Stage 1 as holistically as possible by considering social, environmental, economic and cultural factors in all decision-making.

There will be trade-offs and we will need to make some difficult decisions, but with your input and feedback, we hope to strike the right balance.

GATEWAY DESCRIPTION TIMEFRAME PROJECT DELIVERABLES				
Stage 1 pre-construction	0	Initiation	By the end of 2019	✓ Community engagement plan WE ARE HERE 
	1	Strategic options	Until April 2020	✓ Service need definition ✓ Options analysis ✓ Preliminary cost-benefit analysis
	2a	Business case	Until April 2021	✓ Final business case ✓ Risk register ✓ Detailed cost plan ✓ Detailed cost-benefit analysis
	2b	Statutory and other approvals	By June 2022	✓ Environmental impact statement ✓ Aboriginal cultural heritage impact plan ✓ Stage 2 implementation plan

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

CO-DESIGN

YACTAC has agreed to work with us to co-design community engagement on the Yanco SDLAM projects to make it purposeful, inclusive, timely, transparent and respectful.

We have identified YACTAC as the projects' key stakeholder and an appropriate partner because the organisation:

- is a long-standing and highly professional group
- represents all water access licence holders on the Yanco Creek System
- is funded by voluntarily contributions to an environmental levy
- has intimate knowledge of local people, water policy and the environment
- has significant interest in and ability to advise on the SDLAM projects.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

ADVISORY GROUPS

While YACTAC is our key stakeholder, there are many other important groups with an interest in the Yanco Creek System.

**COMMUNITY
AND INDUSTRY**

**FIRST
NATIONS**

**LOCAL
GOVERNMENT**

**STATE
GOVERNMENT**

**AUSTRALIAN
GOVERNMENT**

To understand and respond to the interests of important stakeholders, we propose to create three advisory groups to discuss and analyse issues that are most significant to them:

- Yanco Community Advisory Group
- Yanco Aboriginal Advisory Group
- Yanco Technical Advisory Group.

Advisory groups will provide non-binding advice to the department. We'll collaborate with them and incorporate their advice into our recommendations and decisions to the greatest possible extent.

Members will be responsible for bringing messages to and from advisory groups and their own constituents.

YACTAC will be a member of all three advisory groups.

Over the next two to three years the advisory groups will provide advice based on best available information and for a range of purposes, including:

- water modelling
- options analysis
- social, cultural and environmental impact assessments
- design specifications and costings
- operating rule development
- statutory approvals.

They will also shape and endorse the indicators we use to measure success and targets we aspire to reach.

[Find information on proposed membership and terms of reference of the groups at industry.nsw.gov.au/water-yanco-creek](http://industry.nsw.gov.au/water-yanco-creek)

Our intent is for membership to be comprehensive and representative.

We expect the advisory groups to be running before the end of 2019. Our first action will be to call for membership by advertising in local papers and writing to important stakeholders.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

REGULAR COMMUNITY CONTACT

We understand that not everyone with an interest in the projects will be available or want to participate in an advisory group. We will provide access to relevant information and opportunities for all interested people to have a say.

Our engagement approach will include regular contact with the community and opportunities for people to review and comment on project deliverables at each gateway.

We will organise and advertise drop-in sessions with the project team and provide avenues for online and written submissions.

Convene advisory groups to identify
opportunities to be explored
problems to be solved
decisions to be made

Provide information the community needs to participate, and seek feedback on drafts and proposals through
an accessible and informative website
advertised consultation periods
drop-in community sessions
online and written responses

Analyse and consider all community feedback by
listening to and acknowledging concerns and aspirations
taking into account new ideas and alternative views

Publish decisions and the impact of community engagement to
be answerable for decisions
communicate how community input affected the decision

Stage 1 is the most important stage for community engagement. This consultation draft is evidence of our intent and commitment at the very start of the Yanco SDLAM projects.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

INTEGRITY

We will regularly compare what we proposed to do with actual activities, and attribute the community impact on major decisions.

We will provide transparency by:

- faithfully recording what stakeholders say
- engaging independent facilitators and reviewers
- openly sharing information and results
- celebrating progress and success with stakeholders.

We will provide accountability by:

- doing what we say we will do
- measuring and making the impact of community engagement visible to stakeholders
- setting clear measures of progress and success
- publicly reporting our performance.

LOCAL PROJECT TEAM

We've established a project team that is accessible and approachable, and with relevant skills and experiences in areas such community engagement, civil engineering and environmental impact assessment.

YACTAC has also agreed to be an independent and objective source of information to the community about the SDLAM projects.

Yanco Creek System

Sustainable Diversion Limit
Adjustment Mechanism Projects

How to have your say on this draft

To cater for the different levels of understanding of the SDLAM projects in the community, we aim to improve awareness and support for the projects over time. This is the purpose of our proposed engagement approach, and we want your feedback to make it successful.

This consultation draft will be available for community input for one month, with the opening and closing dates to be advertised on our website, in local newspapers and on radio. We encourage you to read the consultation draft and share your thoughts with us.

To have your say, you can:

- attend a drop-in community session, to be held at Conargo, Deniliquin, Jerilderie, Morundah, Moulamein, Narrandera, Urana and Wanganella. Information on dates and venues will be advertised
- **visit our website at** industry.nsw.gov.au/water-yanco-creek
- provide a written response during the consultation period, addressed to:
**Department of Planning,
Industry and Environment
Yanco SDLAM Projects
PO Box 205
Deniliquin NSW 2710**

Once we've analysed and considered all community feedback with help from YACTAC, we'll publish the agreed engagement plan on our website.

Our advisory groups will periodically review the engagement plan and propose improvements.

The same engagement and improvement approach will be used to draft and finalise all our projects' key deliverables.

Key questions we'd like your input on

1

What's the best way to keep you informed of the SDLAM projects?

2

Do you think the three project advisory groups are a sensible way to understand and respond to the interests of important stakeholders?

3

Do you think our proposed membership of the advisory groups is comprehensive and representative?

4

How would you like advisory group members to keep the organisations they represent informed?

5

What will convince you that our engagement is effective and genuine?

MDA Motions from Region 9

ENSURE ROBUSTNESS AND INTEGRITY OF SUSTAINABLE DIVERSION LIMIT ADJUSTMENT MECHANISM PROGRAM

MDA REGION 9 RECOMMENDS THAT the Murray Darling Association lobbies the Federal and State Governments to immediately and proactively heed the Productivity Commission's recommendation for better governance and integrated delivery of the Sustainable Diversion Limit Adjustment Mechanism Projects. The 605GL suite of projects is ambitious and in order to prevent large amounts of taxpayer funds being wasted on projects that may not deliver the anticipated environmental outcomes, it is recommended that projects be independently and critically reviewed before they are approved. Further, realistic implementation timeframes should be applied (and legislation adjusted accordingly) to ensure the Basin benefits from meaningful, sustainable results rather than being left with disappointing outcomes through the reckless rushing through of projects to meet an arbitrary policy deadline.

As an example, the Yanco SDLAM Projects are estimated to cost \$85M and deliver between 12 to 28 GL per annum of environmental watering benefits. However, there are grave concerns from credentialed environmentalists and the local Wiradjuri community that the proposed works will effectively compromise rather than enhance biodiversity in the system, most especially the installation of an offtake regulator at the head of the Creek. Governments and communities need confidence through independent review that the environmental outcomes of the Yanco Projects will be genuinely achievable and should feel satisfied that the available funding isn't being opportunistically leveraged to deliver capital works projects seeking to primarily improve the business cases of Water NSW and various irrigation companies.

UNDERSTAND AND RESPOND TO THE UNINTENDED CONSEQUENCES OF CURRENT WATER TRADING POLICIES / RULES / REGULATIONS

Water is a lifegiving force and a critical input into Australia's farming endeavours. Even though it can be bought and sold, water should never be considered a commodity. With Australia being a dry country, every drop of water counts and must be used responsibly, including across the Murray Darling Basin. A responsible citizenry and responsible governments must ensure that a megalitre released from a dam will realise as close to a megalitre on the farm, with minimal losses.

Formal Irrigation areas or schemes were nation building investments originally funded through significant taxpayer investment from the late 1800s. Their true value needs to be understood and appreciated in today's dollars, as well as their full potential as vehicles to more efficiently deliver Basin Plan outcomes. Arguably worth multi-billions of dollars, and well capable of providing optimal agricultural production with least loss of water, the Basin's irrigation areas instead being systematically eroded by a suite of government policies that fail to recognise the value of the whole as opposed to the value of the parts (individual farms).

The development of an unregulated water trading market, compounded by loose land use planning and energy strategies whose integration extends only to the location of transmission lines, is undermining the sustainability and true potential of nation building irrigation schemes to deliver optimal farm production in the Basin using the least amount of water.

The current lack of transparency and loose operations surrounding the sale and purchase of water makes it practically impossible for rural communities with water dependent economies to effectively navigate and plan their desired futures. There is also growing awareness that the notion that 'water will go to the highest value crop' is not necessarily in the best interest of the nation or Basin communities, be that socially, economically or environmentally.

What must absolutely be avoided in the Basin is a farming and food/fibre processing sector that has all its eggs in one basket. The Basin needs to foster resilience through diversity, which gives appropriate latitude to responsibly harness the wet years and sustainably endure the dry years.

MDA REGION 9 RECOMMENDS THAT Federal and State governments need to

- i) **recognise, value, protect and honour the significant investment by taxpayers over many decades to establish irrigation schemes to feed the nation, and**
- ii) **immediately place a moratorium on the development or opening of new irrigation farms downstream of long established irrigation areas until the Basin Plan objectives are fully met and the full implications (environmental, economic and social) of the further geographic distribution of water entitlements is properly researched and understood.**
- iii) **ensure that existing irrigation schemes are optimally utilised and are not subject to ongoing exacerbating swiss cheese effect through poor and / or silo-ed policy decisions and ineffectual land use planning that fails to consider implications for the Basin Plan.**
- iv) **engage meaningfully with and have genuine regard to the findings of the ACCC Inquiry into water trading that is underway, and**
- v) **support the call for a transparent National Water Trading Platform which will serve as a single source of information on water, from allocations through to sales, as well as**
- vi) **the routine provision of disclosure statements by the larger water holders (such as any person or entity that owns more than upwards of 2% of available entitlements in an area).**
- vii) **recognise and properly evaluate the compounding effects of an unregulated water trading environment and the implementation of the Murray Darling Basin Plan on the viability and sustainability of established nation building irrigation schemes that would be unaffordable to replicate today and consider how these should be optimised to ensure the most responsible use of available water for agricultural endeavour. In particular, the advantages of a diversified agricultural sector within established irrigation systems to GDP, and its associated local economic and community resilience, should be weighed up against the risk of shifting water to monoculture-based 'high value' crops on greenfield (cheaper) lands downstream of the established irrigation schemes.**

DELAY WATER RESOURCE PLAN FOR THE GREATER GOOD OF THE BASIN

It is noted that the development and accreditation of the Basin Governments Water Resource Plans is behind schedule. **MDA REGION 9 RECOMMENDS THAT the MDA lobbies Basin governments to extend the 2019 deadline for those plans where there are complex changes required and there are material risks to the quality of the plans.**

PROTECT PRIME IRRIGATION LAND FROM BEING STERILISED THROUGH SILO-ED ENERGY POLICIES

Development Applications for the construction of large scale solar farms in regional areas have risen in recent years. While the move to renewable energy sources is viewed as a positive for long-term environmental outcomes, it should not come at the cost of productive farmland, particularly those tracts of Basin lands located within nation building irrigation areas that form the food bowls of Australia. Most importantly, Basin Governments should recognise that irrigation farms should never be viewed in isolation of the whole irrigation area and its associated infrastructure when making decisions about the location of solar farms.

MDA REGION 9 RECOMMENDS THAT the MDA lobbies

- i. the NSW State Government (and any Basin Governments from other States with similar issues) to revise its Infrastructure SEPP to have regard to the contribution of established irrigation areas - that offer the most efficient use of scarce water and would be unaffordable to replicate - to Australia's food security and to generating export earnings for the State and the Nation when assessing and determining applications for large scale solar farms.**
- ii. Basin Governments, should schemes still be approved, to make compulsory development contributions by solar companies commensurate with the loss of a typical crop to the wider processing and freight economy, for the life of the solar project.**

Chief Executive Officer's Report

August 2019

23/08/2019	Region 1 Ordinary Meeting	Via Zoom

2. Engagements and events

2.1 Connecting Catchments and Communities

The second Connecting Catchments and Communities event was held in Euston on Tuesday 30 July, focusing on Constraints. The event was attended by business and community leaders from across the Basin. Technical experts including rural water broker Lewis Campbell, Almond Board of Australia CEO Ross Skinner and government agencies and departments provided a cross section of discrete perspectives on water demand, deliverability and environmental and economic sustainability.

The Murray Darling Basin Authority and the Commonwealth Environmental water Holder provided information on operational and ecological management strategies. A range of ecologists showed a system under critical pressure, while growth predictions presented by the almond industry and councils all combined to highlight the environmental, economic and social interconnectedness of our Basin regions.

Hearing from the ABA, communities and investors are excited by the economic opportunities presented by the growth in permanent plants. However, there is increasing recognition that relying solely on the market to supply water doesn't factor in the immense risks associated with total water availability and deliverability.

A key issue emerging from the discussion clearly illustrated that the crisis in the Darling River is placing immense pressure on the Murray River and its communities.

Outcomes from the day recognised the need for enhanced interagency collaboration as the tension between demand and deliverability increases.

This was one of the most technically wide ranging, thought provoking, possibly even confronting events we have facilitated. I am genuinely hopeful that this will be the beginning of a

conversation in which we are able to bring together leaders in water management, in water trade at community level to address the challenges of our system constraints.

As the Connecting Catchments and Communities (CCC) program evolves, the MDA is becoming more proactive in capturing and acting on its outcomes.

Identification of a range of the issues and challenges explored at the CCC is reflected in the Ministerial Council (MinCo) resolution on constraints, with Vic and NSW to do independent modelling.

The MDA wrote letters to all Ministers on MinCo incorporating some of the concerns raised at the CCC event.

The MDA continues to seek meetings and engage with relevant agencies and departments calling for more work to be done to ensure integrated planning and management of regional growth and water allocations and management.

Comms and Engagement Officer Jess Maher and Policy Officer James Marshal presented findings at the SEGRA conference in Barooga.

2.2 The Hon Minister Michael McCormack - Acting Prime Minister

National President Cr David Thurley and I met with the Deputy Prime Minister The Hon Minister Michael McCormack in Wagga Wagga on Friday 16/08/2019.

The following items were discussed

- **MDA National Conference** - 22nd – 24 October 2019 in Toowoomba. Minister McCormack noted his interest in the program and in attending the event. Unfortunately, it is a parliamentary sitting week for the lower house, precluding him from doing so. Minister McCormack suggested that Minister McKenzie, Minister for Agriculture may be interested and that he will suggest to Ms McKenzie to consider the opportunity.
- **National Water Grid Authority taskforce** – Minister McCormack committed to providing a speaker to the National Conference from the Authority taskforce.
- **Municipal Engagement Officers** – The project proposal for the MCE funding was discussed. Minister McCormack acknowledged that the MDA was increasingly being relied upon by Basin governments and communities 'to do more with less' and encouraged the MDA to apply to Minister Littleproud for the funding and to write to him (Minister McCormack) separately also.

2.3 Municipal Association of Victoria – Monday 19 August, Melbourne.

Meeting with MAV President Cr Coral Ross, Water Policy Officer Rosemary Hancock and CEO Kerry Thompson (apology).

Discussions included

- Response to the Independent Social and Economic Panel ToR. Concerns re governance, non-disclosure of interests, and consultation time frame.
- MDA National Conference 2019
- Opportunities for a closer working relationship between MAV and MDA incl possibility of an MOU for consideration

- Implementation of a CRM (Customer Relationships Management) system
- Membership growth and benefits

2.4 SEGRA (Sustainable Economic Growth for Regional Australia) Annual Conference - Barooga

On Monday 19th of August, Communications and Engagement Officer Jessica Maher and Policy Officer James Marshall presented at the Sustainable Economic Growth for Regional Australia (SEGRA)'s Murray Darling Basin Forum in Barooga, New South Wales.

In a session exploring current actions addressing challenges in the Basin, the MDA presentation focussed on the Connecting Catchments and Communities program as inter-regional events aimed at enhancing water literacy and exchanging information between councils, communities and agencies across the Basin.

The audience included representatives from local government, Charles Sturt University, the Basin Socio Economic panel, MDBA and more, who were all very engaged in the presentation and asked a wide range of interesting questions. The audience was particularly interested in how we, at the MDA, engage with communities and facilitate events where community voices are heard.

The event highlighted that there is a great need for more Basin literacy and community engagement.

Managing Environmental Change in the Murray Darling Basin: implement best practice landscape scale planning and management

On Wednesday 21, the CEO attended the conference and presented as a panellist considering the topic: *Managing Environmental Change in the Murray Darling Basin: implementing best practice landscape scale planning and management*. The session was facilitated by Ashley Bland, Director, Constructive Energy & SEGRA National Steering Committee, with other panellists Peter Waterman, Adjunct Professor, Institute for Land, Water and Society (ILWS), Charles Sturt University and Dr Chris Yeats, Executive Director, Geological Survey of NSW, Department of Planning and Environment, NSW Government.

3 National Conference

Opening address to be provided by Northern Basin Commissioner and A/Inspector-General for the Murray Darling Basin.

4 Reflecting Growth in Engagement

Notable Increase to the MDA newsletter subscriptions.

- Thomas Carrigg from ACCC
- Richard Alcorn from Parliament of Australia
- Charles Everist from Victorian Farmers Federation
- Professor David Goldney from Western Australia

5 Correspondence Out

The Ministerial Council Meeting held in Canberra on Sunday 4 August was followed by factious media coverage and an unusual delay of some 3 ½ days in releasing the Communique, suggesting a possible return to division and disunity on the Basin Plan at Ministerial level.

[Murray-Darling Ministerial Council – 4 August 2019 Communique](#)

With the Council of Australian Governments due to meet on the following Friday, the CEO took the opportunity to write to all Basin government First Ministers, Water Ministers and their opposition counterparts, and Local Government Ministers to state our support for the united outcome and clear steps determined by the Ministerial Council, and urging all Basin Governments to set aside any disunity and stay the course, to work together to ensure the integrity of the Basin Plan is uncompromised and that its implementation is adaptive and timely, delivers a healthy working Basin for all.

[Please click here for a copy of that letter.](#)

We were pleased to note that we have received a positive response to many of the (individually addressed) letters and that at COAG, leaders from the Murray-Darling Basin reaffirmed their commitment to the Murray-Darling Basin Plan and worked through next steps in its implementation. Further, Basin leaders agreed to a joint response to the Productivity Commission's Murray-Darling Basin Plan: Five-Year Assessment and endorsed the establishment of an Inspector-General of Murray-Darling Basin Water Resources, to improve transparency, accountability and community confidence in the delivery of the Basin Plan.

Membership engagement continues to present a challenge for the association. Discussions with our Victorian state counterparts MAV identified several shared challenges, with some discussion on strategies to quantify and communicate member benefits.

7 Projects

MDA Basin Communities Leadership Program

Preparations for exchange of contracts with the Department of Agriculture continue. All information and documentation have been provided by the MDA and approved by the Department.

8 Organisational development

Business update: The MDA strategic plan 2016-19 set a goal of becoming a strong, viable, self-sustaining organisation. Since the strategic planning workshop earlier this year, the board have committed to invest in the association's resources and capability (388-4.3) to achieve this goal and to deliver on our purpose overall.

In March/April, I have drafted an internal Organization and Human Resource Plan 2020 to guide the development of the team. It should be noted that the plan is and must remain adaptive to respond to the evolving needs of the business as they emerge.

Since April this year, we have recruited to three new positions. These positions are

- Communication and Engagement Officer
- Policy Officer and
- Executive Assistant.

All positions are currently part time. The incumbent personnel are Jess, James and Cathy respectively. All three continue to make a tremendous contribution to development of the organisation in a seemingly chaotic environment of rapid and dynamic change both the internally to the business, and externally in response to a busy Basin environment.

We are currently recruiting for a further two positions

- Leadership Training Coordinator, and
- Grants and Submissions Writer

We are also currently working with a local NDIS provider and social enterprise support officer to provide an employment opportunity for a higher-needs employee.

I have negotiated an increase on our existing lease to now occupy half of the first level of the building we are in – taking in 4 offices, a storeroom and a collaboration hub, at a very modest increase to the original cost of the 2 office lease. We have installed desks, phones and data points to accommodate up to a total of 10 personnel, which is adequate to accommodate our projected growth over the coming 12 months at lease. Option for further expansion is built in if required. Additional costs of expansion now will be limited to wages and the desktop computers, at approx. \$2k per station commissioned only upon appointment of personnel.

All MDA personnel, archives and assets are now located on the one premises, realising a saving of approximately \$2500 per year.

These changes are both operational and incremental, often seeming too inconsequential to report on a month to month basis. However, when considered together the development of the MDA as a business is in an exciting, and clearly strategic period of growth.

It should be noted that the current growth and development of the MDA is absent external grants, funding or projects.

Please [click here to see a photo-board](#) of the current MDA office space.

1. Community participation in the planning system

1.1 What is our community participation plan?

Community participation is an overarching term covering how we engage the community in our work under the Environmental Planning & Assessment Act 1979 (EP&A Act), including legislative reform, plan making and making decisions on proposed development. Our CPP is designed to make it clearer for the community to understand how to participate in planning matters within Murrumbidgee Council.

The level and extent of community participation will vary depending on the community, the nature of the proposal under consideration and potential impacts of the decision. The community includes anyone who is affected by planning in Murrumbidgee Council.

This CPP also establishes our community participation objectives which we use to guide our approach to community engagement.

Table 1: What functions does the community participation plan apply to?

Plan making and strategic planning	Including amendments to or the creation of strategic planning statements or strategies, planning proposals to amend the local environmental plan, updates to the development control plan or contribution plan.
Development Applications – assessing plans for individual sites.	When making decisions on a proposed development or planning enquiry/proposal, consideration is given to whether proposals are in accordance with plans, applicable policies and guidelines developed by Murrumbidgee Council or the Department of Planning, Industry & Environment (DPIE).

1.2 Who does this Community Participation Plan apply to?

Our CPP is a requirement of the EP&A Act (see division 2.6 and Schedule 1 of the EP&A Act) and applies to the exercise of planning functions undertaken by Murrumbidgee Council.

2. How can the community participate in the planning system?

2.1 Our community participation objectives are to:

- (a) ensure our communities are able to input into planning decisions that affect them;
- (b) promote awareness in the community about planning matters including development proposals;
- (c) promote transparency and accountability to ensure planning decisions are based on best practice, are defensible and are in accordance with statutory requirements; and to
- (d) ensure that Council in making planning and development decisions are open, transparent, equitable and inclusive.

3. What is the role of exhibitions in the planning system?

Opportunities to participate in the planning and assessment process will respond to the nature, scale and likely impact of the proposal or project being considered or assessed. A regular and valuable way for the communities to participate in the planning system is by making a submission on a proposal during the formal exhibition period. Submissions can highlight positive aspects of a plan to be encouraged or raise areas of concern that may require further attention. You can also provide us with feedback at any time.

3.1 Exhibitions

A key technique we use to encourage community participation is formal exhibitions. During an exhibition we make available relevant documents that may include a proposed development that we are seeking community input on. In reaching decisions on proposals that have been exhibited, the Council balance's a wide range of factors to ensure that decisions are in the public interest. This includes considering the objects of the EP&A Act, the strategic priorities of the Government, the community's input, the land use priorities identified in strategic plans and applicable policies and guidelines.

3.2 When and how to make a submission

The following table outlines the types of plans or development applications that submissions are open for and how to go about making a submission.

Public exhibition - for plan making, ie a strategy or planning proposal As a minimum, exhibition material will be provided on Murrumbidgee Council's "Documents on Exhibition" webpage, and at the Coleambally, Darlington Point and Jerilderie Offices. Written notice will also be provided to key landowners and affected neighbours in accordance with Council Policy or Development Control Plan.	How to make a submission Submissions can be made in writing or emailed to mail@murrumbidgee.nsw.gov.au by 5pm on the nominated closing date for submissions. Details will be made available on the notification material. All submissions will be made public.
Public exhibition – for development applications Depending on the type of development and likely impacts, notification may include: <ul style="list-style-type: none">• An email or letter to affected neighbours• Advertisement in the local newspaper• Exhibition material provided on Murrumbidgee Council's "Documents on Exhibition" webpage and at the Coleambally, Darlington Point and Jerilderie Offices	How to make a submission After viewing the information provided on Murrumbidgee Council's website (see development Applications on Exhibition) or viewing at one of our offices. If you have an interest in or think you may be affected by the development, you can make a submission to Council. Submissions should be sent to mail@murrumbidgee.nsw.gov.au by 5pm on the nominated closing date for submissions. Persons wishing to obtain more information about any application can contact Council by emailing mail@murrumbidgee.nsw.gov.au or by phoning 1300 676243 during business hours. Any objection must clearly specify the grounds of objection and the reasons. Council will consider the

	<p>merits of an objection in accordance with statutory requirements.</p> <p>Submissions must be in writing either by email or letter and submitted within the exhibition period. The submission must clearly identify the subject property and also include the name and contact details of the author.</p> <p>All submissions will be made public unless a specific request for confidentiality is made where names and addresses will be redacted.</p>
--	--

Types of advertised development applications include:

- Removal, demolition or alteration of a heritage item or properties within a heritage conservation area
- Integrated development
- Designated development

Some of the issues that can be considered relate to the following matters:

- Overshadowing
- Privacy
- Traffic and access
- Public interest
- Visual impacts
- Noise, odour or other pollution
- Stormwater and drainage issues

3.3 Exhibition timeframes

Mandatory minimum exhibition timeframes	
Draft Community Participation Plan	28 days
Draft Local Strategic Planning Statements	28 days
Draft Regional Strategic Plans	45 days
Planning proposals for local environmental plans subject to a gateway determination	28 days or as specified by the gateway determination which may find, due to the minor nature of the proposal, that no public exhibition is required
Draft development control plans	28 days

Draft contribution plans	28 days
Application for development consent in the following instances: <ul style="list-style-type: none"> Where a variation to a development standard is proposed in accordance with Clause 4.6 of the Local Environmental Plan Where a variation is proposed to a prescribed standard in the Development Control Plan or Council Policy. Where the development is defined as hazardous or offensive in accordance with State Environmental Planning Policy No. 33 – Hazardous and Offensive Development. Where the development is proposed by Council or on land in the care and control of Council. <p>Any other occasion where Council feels that the public interest might be compromised or where impacts of a proposal warrant public notification.</p>	14 days
Application for development consent for: <ul style="list-style-type: none"> designated development integrated development 	28 days
Application for modification of development consent that is required to be publicly exhibited by the regulations	Up to 14 days based on scale and nature of the proposal
Environmental impact statement obtained under Division 5.1	28 days

Non-mandatory exhibition timeframes	
Draft Legislation, regulation, policies and guidelines	28 days based on the urgency, scale and nature of the proposal
State Environmental Planning Policies (SEPPs)	Discretionary based on the urgency, scale and nature of the proposal

3.4 Key points to note about public exhibitions

- A public authority is not required to make available for public inspection any part of an environmental impact statement whose publication would, in the opinion of the public authority, be contrary to the public interest because of its confidential nature or for any other reason.
- Timeframes are in calendar days and include weekends.
- If the exhibition period is due to close on a weekend or a public holiday, we may extend the exhibition to finish on the first available work day.
- The period between 20 December and 10 January (inclusive) is excluded from the calculation of a period of public exhibition.
- Any material submitted with a development proposal shall be treat as a public document and not intellectual property.

DRAFT

FAQs – Community Participation Plan (CPP)

March 2019

This table of frequently asked questions on Community Participation Plans (CPPs) has been composed in response to questions put to the Department of Planning and Environment (the Department). This document will be updated as new questions arise.

Community FAQs

No.	Question	Answer
General Questions		
1	What is a CPP?	<p>A CPP is intended to make it easier for the community to understand how to participate in planning matters in NSW. The requirement to prepare a CPP applies to relevant planning authorities under the Environmental Planning and Assessment Act 1979 (EP&A Act).</p> <p>A CPP must set out how and when a planning authority will engage with its community on the planning functions it performs. A CPP must also set out the minimum public exhibition timeframes relevant to the planning authority that are provided in Schedule 1 to the EP&A Act. All other requirements for a CPP are set out in Division 2.6 of the EP&A Act.</p> <p>It is important to note that a CPP should describe at a high-level, how and when a planning authority engages in its planning functions. It does not need to outline specific engagement strategies for each type of planning proposal or project.</p>
2	What is the status of the Department's CPP?	The Department exhibited a draft CPP on behalf of the Planning Minister and Planning Secretary between October and December 2018. Feedback on the draft was received through community workshops, one-on-one engagement and formal submissions. This feedback is being considered with a view to finalising the Departments CPP.
3	Does the Department's draft CPP cater to the different stages of all projects and proposals?	The Departments CPP describes how and when it engages the community at all stages of the planning process for its planning functions.
4	How can the community get involved in the CPP?	<p>The community can get involved in the development of the Department's CPP and implementation of the measure across NSW by:</p> <ul style="list-style-type: none"> – Emailing the team at legislativeupdates@planning.nsw.gov.au. – Calling the hotline on 1300 305 695 and asking to speak to a CPP project team member. – Contacting your local council or other NSW planning authorities. – Visiting any Service NSW centre where staff will answer any questions you have or connect you to an appropriate officer who can.

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
5	How will the Department monitor and evaluate their engagement against the CPP?	<p>The Department intends to monitor and evaluate its engagement activities by reference to the measurable actions outlined for the five community participation objectives in the Department's draft CPP. It is intended that the community will also be able to use these actions to measure and assess the Department's community participation initiatives.</p> <p>Section 2.24(3) of the EP&A Act states that a CPP will be reviewed periodically.</p>
6	What is the Department's role in the implementation of the CPP measure?	In addition to the development of our own CPP, which other planning authorities can use as a template, the Department will assist councils and other planning authorities through an implementation program to develop their CPPs before the deadline of December 2019.

CPP minimum requirements

7	What are the minimum requirements for a CPP?	<p>The minimum requirements for a CPP include:</p> <ul style="list-style-type: none"> – Detail how and when a planning authority will undertake community participation when exercising relevant planning functions as specified in section 2.21 (2) of the EP&A Act. – Have regard to the community participation principles outlined in section 2.23 (2) of the EP&A Act. – Set out the minimum mandatory public exhibition timeframes and notification requirements for the planning authorities relevant planning functions as per Schedule 1 of the EP&A Act and acknowledge that there are mandatory notification requirements provided in the regulations, the EP&A Act and potentially a CPP. – Be publicly exhibited for a minimum of 28 days. – Be published on the NSW planning portal by 1 December 2019
8	Who needs to prepare a CPP?	<p>Section 2.21(1) of the EP&A Act states that the following planning authorities must prepare a CPP and are subject to the community participation requirements:</p> <ul style="list-style-type: none"> – The Minister for Planning, – The Planning Secretary, – The Greater Sydney Commission, – The Independent Planning Commission,

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
		<ul style="list-style-type: none"> – a Sydney district or regional planning panel (See question 9), – a council, – a local planning panel (See question 9), – a determining authority under Part 5, – a public authority. <p>Note: For many public authorities, except councils, the need to prepare a CPP is only triggered where they prepare an environmental impact statement (EIS) under Part 5 of the EP&A Act. This is only likely to occur when another party/body is proposing to carry out the development as in most cases these activities will be State significant infrastructure and dealt with as such under the EP&A Act. Public authorities may still wish to prepare a CPP in case such a situation should arise.</p>
9	Will a separate CPP need to be prepared for local planning panels, Sydney district or regional planning panels?	<p>We note councils undertake the majority of community participation initiatives on behalf of local and regional planning panels and their CPP will address these functions.</p> <p>This is similar to the way that the Planning Secretary's CPP outlines community participation initiatives that the Department undertakes on behalf of the Planning Secretary and the Planning Minister. For this reason, the Department is considering whether a regulation should be made to remove the obligation for these panels to prepare a CPP.</p> <p>If this occurs then the relevant council's CPP will apply to those panels.</p>
10	Can councils include engagement for planning functions not listed in 2.21(2) of the EP&A Act in their CPP?	<p>In addition to the minimum requirements for a CPP, as per 2.22(2) of the EP&A Act, a CPP may also prescribe additional mandatory requirements for community participation.</p> <p>Councils may also wish to outline consultation processes for planning functions that have no mandatory requirement for public exhibition. These could include planning policy initiatives or complying development where consultation is undertaken by the Department in developing the code and not for subsequent complying projects.</p>
11	Do all development applications need to be exhibited for 14 days?	<p>No. Schedule 1 of the EP&A Act states that development application's be exhibited for 14 days unless a planning authority sets a different timeframe in its CPP or states in its CPP that for specified development applications no public exhibition is required for.</p> <p>For example, councils may state in their CPP that no public exhibition is required where a proposal fully complies with their controls.</p>

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
12	How can councils have regard to the Community Participation Principles?	<p>When developing a CPP planning authorities demonstrate that they have regard to the community participation principles in Section 2.23(2) of the EP&A Act. The principles are:</p> <ul style="list-style-type: none">a) The community has a right to be informed about planning matters that affect it.b) Planning authorities should encourage effective and on-going partnerships with the community to provide meaningful opportunities for community participation in planning.c) Planning information should be in plain language, easily accessible and in a form that facilitates community participation in planning.d) The community should be given opportunities to participate in strategic planning as early as possible to enable community views to be genuinely considered.e) Community participation should be inclusive and planning authorities should actively seek views that are representative of the community.f) Members of the community who are affected by proposed major development should be consulted by the proponent before an application for planning approval is made.g) Planning decisions should be made in an open and transparent way and the community should be provided with reasons for those decisions (including how community views have been taken into account).h) Community participation methods (and the reasons given for planning decisions) should be appropriate having regard to the significance and likely impact of the proposed development. <p>These principles are consistent with the model for engagement set by the International Association for Public Participation and represent best practice engagement for planning matters. The Department's exhibition draft CPP can be used as a template for how to demonstrate regard to the principles in the EP&A Act.</p>

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
13	What are the different ways that councils can prepare a CPP?	<p>Councils can meet the CPP requirements in two ways.</p> <p>Option 1 – Rely on or update an existing plan (strategy) under section 402 of the <i>Local Government Act</i> (LG Act)</p> <p>To reduce the need for multiple community documents, councils have the option to use an existing Community Strategic Plan (CSP) or Community Engagement Strategy (CES) under section 402 of the LG Act to satisfy the requirements of a CPP.</p> <p>In most instances it is likely that councils existing CSP or CES will need to be updated to meet the CPP requirements as outlined in Question [3].</p> <p>When amending a CSP or CES to meet the requirements of a CPP it is recommended that a council state in the amended plan or strategy that it has been prepared to satisfy the requirements of a CPP under the EP&A Act and acknowledge which sections are being used to meet the CPP requirements. It is also important that an existing CSP or CES makes it clear that either the entirety or part of the document has been prepared to satisfy the legislative requirements for a CPP and is to be treated as such.</p> <p>The amendments to either the CSP or CES (which will collectively become known as the CPP) must then be exhibited for 28 days in accordance with the minimum public exhibition requirements for a draft CPP in Schedule 1 to the EP&A Act.</p> <p>Option 2 – Prepare a standalone CPP</p> <p>Councils can prepare a standalone CPP and are encouraged to use the Department's exhibition draft CPP as a template.</p> <p>Councils may contact the legislative updates team with any questions in relation to Option 1 and 2.</p> <p>The Department has worked closely with the Office of Local Government's community engagement team who are briefed on the CPP requirements. Councils may also consider speaking with their Office of Local Government community engagement representatives for support on their overall engagement strategy.</p>
14	Can councils use their Development Control Plan (DCP) to meet the requirements of a CPP?	<p>No. A DCP cannot be used as a CPP even where a DCP sets out the minimum mandatory exhibition timeframes.</p> <p>Where councils have a DCP or part of a DCP that deals with community participation for their planning functions this material can be used their CPP. In these circumstances once the CPP is made council would then be able to amend that part of the DCP as community participation requirements will be set out in the CPP.</p>

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
15	What are the options for non-council planning authorities to prepare their CPP?	All non-council planning authorities that are required to prepare a CPP must prepare a standalone CPP and are encouraged to use the Departments exhibition draft CPP as a template.
16	Will the form, content and procedures for CPPs be prescribed in the regulations?	There is legislative scope to prescribe regulations to set the form, content and procedures for making and publishing CPPs, their amendment and reporting on their implementation. At this stage it is not intended to make any regulations in relation to the form, content and procedures.
CPP engagement and finalisation		
17	What are the exhibition requirements for CPPs?	Draft CPPs, or amendments made to existing plans or strategies prepared under section 402 of the LG Act to meet the CPP requirements, must be exhibited for 28 days as set out in Schedule 1 of the EP&A Act.
18	How do public exhibition requirements in a CPP interact with public consultation conditions in a gateway determination	<p>A CPP sets out the mandatory minimum public exhibition periods for relevant planning functions. A planning proposal subject to a gateway determination must be exhibited for a minimum period of 28 days or:</p> <ol style="list-style-type: none"> If a different period of public exhibition is specified in the gateway determinations for the proposal – the period so specified, or If the gateway determination specifies that no public exhibition is required because of the minor nature of the proposal – no public exhibition. <p>Some community consultation requirements may be determined for a planning proposal at a gateway determination. In some circumstances this may be limited to the period of public exhibition. It is recommended planning authorities set out their community consultation approach for planning proposals in their CPP but note these may be subject to the requirements of the gateway determination.</p>
19	When should councils and other planning authorities start preparing their CPP?	<p>All community participation plans must be in place and published on the ePlanning portal by 1 December 2019.</p> <p>The Department recommends commencing development of CPP's in the first half of 2019. This will allow time for their finalisation noting the need to publicly exhibit draft CPPs for a minimum period of 28 days.</p>
20	Does the Department need to endorse or approve a planning authority's CPP?	<p>No. Once a planning authority has developed their finalised CPP it must be published on the NSW planning portal.</p> <p>A CPP will be considered valid if the plan has not been challenged in proceedings commenced in the Land and Environment Court (LEC) within 3 months of it being published on the NSW planning portal.</p>

FAQs – Community Participation Plan (CPP)

March 2019

No.	Question	Answer
21	How will the Department monitor and evaluate a councils CPP?	To ensure compliance and consistency, the Department will undertake a review and audit of CPP's in 2020. Additionally, consideration is being given to the creation of regulations to set requirements for reporting on implementation.

1.1 Building and Supporting a Diverse Community:

Strategic Activity		Action	Accountable Officer	Status	Comment
Strategy 1.1.1	Improve and increase community and public transport access and availability options throughout the Council area including services outside our Local Government Area	<p>Action: 1.1.1.1: Actively liaise and coordinate with public transport providers to ensure improved public transport services</p> <ul style="list-style-type: none"> Initiate 3 meetings with public transport providers annually to better understand community transport needs and issues – 30 June 2019 <p>Action 1.1.1.2: Undertake analysis of public and/or community transport needs to assist in planning service provision</p> <ul style="list-style-type: none"> Incorporate a community transport analysis into the Community Services Plan to be developed – 30 June 2019 	OM	No action as at 30 June 2019.	Limited public transport in Local Government area.
			CCSM	Ongoing	Community transport needs identified and further funding being sought.
Strategy 1.1.2	Engage and encourage the disadvantaged members of Murrumbidgee communities by supporting the work of regional government agencies and NGOs	<p>Action 1.1.2.1: Partner with organizations to develop a strategy supporting the supply of affordable accessible and adaptable housing</p> <ul style="list-style-type: none"> Initiate discussions with key stakeholders including Waddi Housing Inc. to identify the role Council can play in regards to developing such a strategy – 30 June 2019 	CCSM	Discussions held with potential private developer in Darlington Point.	

		Action 1.1.2.2: Identify suitable land for residential development by other stakeholders	MPE	33% complete. Darlington Point Structure Plan in place.	Council wide Strategic Landuse Plan funding received. Project to commence 2019/2020
Strategy 1.1.3	Foster community and provide opportunity through the performing and visual arts	Action 1.1.3.1 Identify a program or program of events in partnership with arts and community groups within Murrumbidgee <ul style="list-style-type: none"> • Work with stakeholders including Western Riverina Arts to identify and cost the potential for a program to be developed – 30 June 2019 	CCSM	"Murrumbidgee Arts Kinship Enterprise" MAKE group formed under the Respite Program to foster community arts.
